

Forceps-Free Meibomian Gland Expression (FF-MGE): Updated management of posterior blepharitis & MGD

Hazem Rashed, MD
Ain Shams University

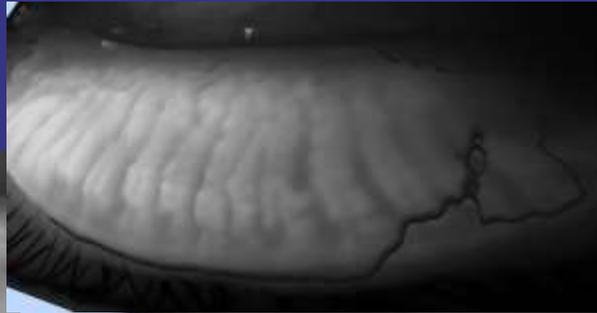

OSD – Posterior blepharitis

OSD – MGD

Diagnostic Tests

► Meibography

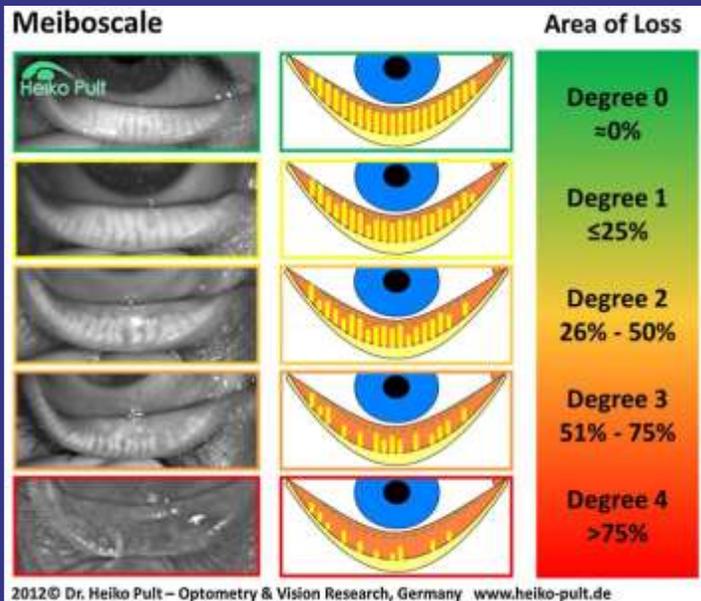

OSD – MGD

Diagnostic Tests

► Meibography

- Infrared light to image the meibomian glands (MG)
- Graded according to area of MG loss
- Abnormalities recorded: Distorted, Tortuous, Shortened, Thinned, Thickened, Tadpole

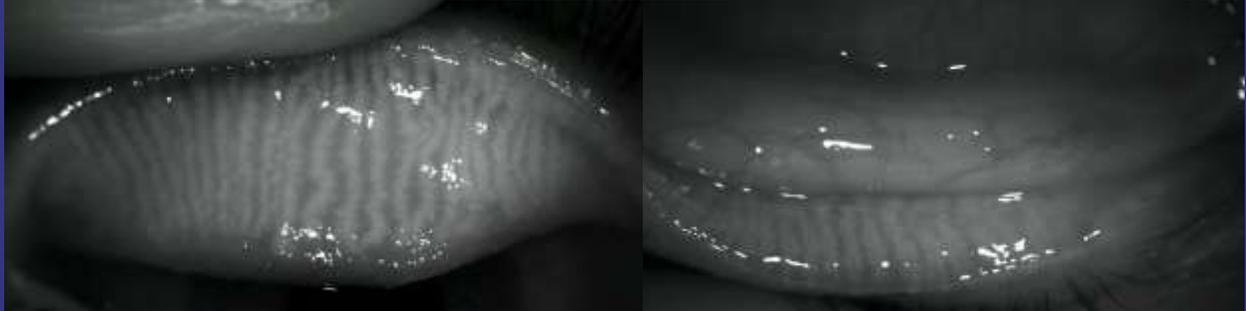

OSD – MGD

Diagnostic Tests

- ▶ Meibography

Degree 1
≤25%

OSD – MGD

Diagnostic Tests

- ▶ Meibography

Degree 2
26% - 50%

OSD – MGD

Diagnostic Tests

- ▶ Meibography

Degree 3
51% - 75%

OSD – MGD

Diagnostic Tests

- ▶ Meibography

Degree 4
>75%

OSD – MGD

Diagnostic Tests

▶ IF (Interferometry)

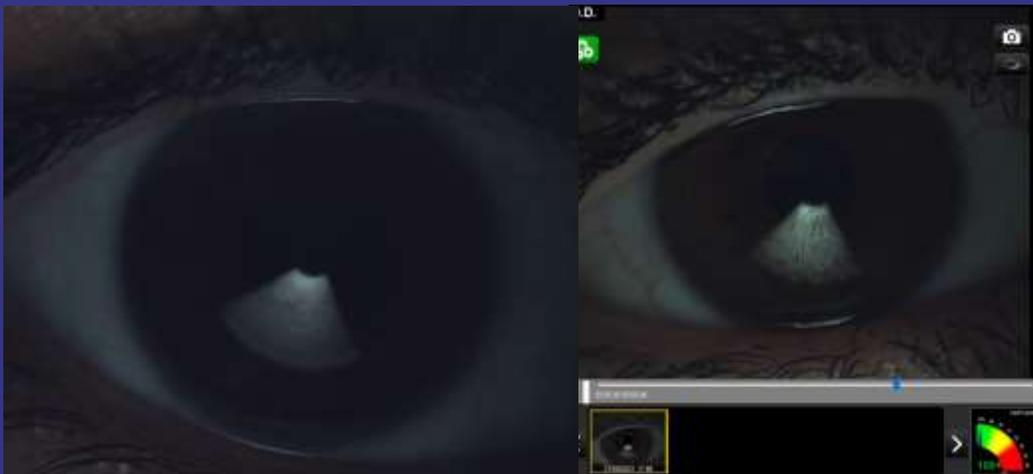

- ▶ Measures the Lipid Layer Thickness (LLT)
- ▶ Interferences between lipid and aqueous layers are detected and thickness calculate by neural networks
- ▶ Normal thickness from 80 nm m to 160 nm
- ▶ Borderline thickness from 60 nm to 80 nm
- ▶ Lipid layer deficiency below 60 nm

OSD – MGD

Diagnostic Tests

▶ IF (Interferometry)

OSD – MGD

Diagnostic Tests

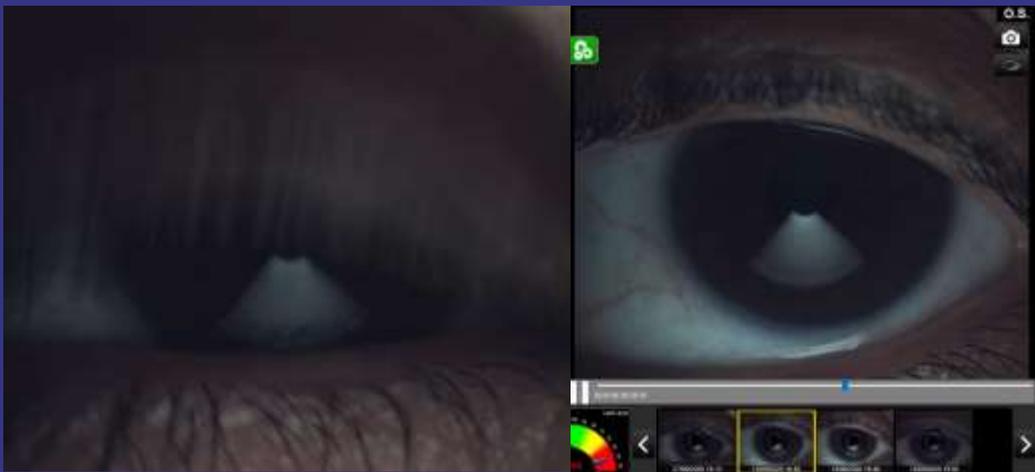

- ▶ IF (Interferometry)

OSD – MGD

Diagnostic Tests

- ▶ IF (Interferometry)

OSD – MGD

TFOS DEWS II: Severity Based, Staged \uparrow Recommendations

Step 1

• Education, environmental and dietary modifications, ocular lubricants, lid hygiene (warm compresses)

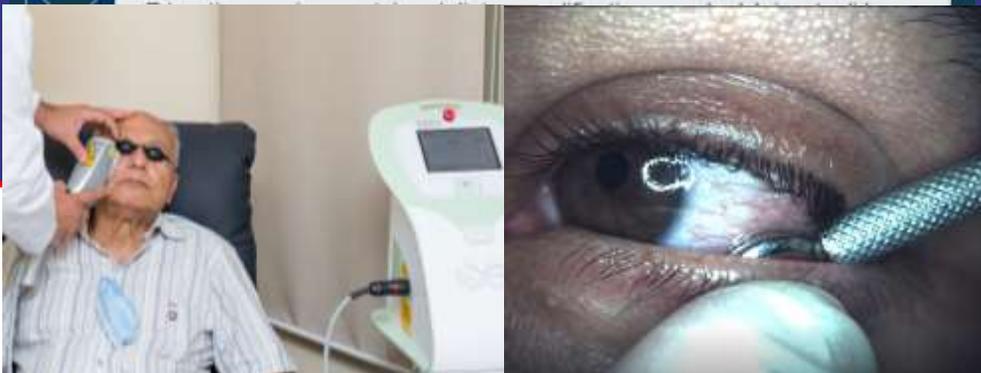

Step 2

• Topical prescription (steroids, cyclosporine, lifitegrast), topical or oral antibiotics (eg, doxycycline), punctal plugs, physical heating, and expression of the meibomian glands

Intense Pulse Light (IPL) +
MG expression
In MGD

OSD – MGD

TFOS DEWS II: Severity Based, Staged \uparrow Recommendations

MG expression

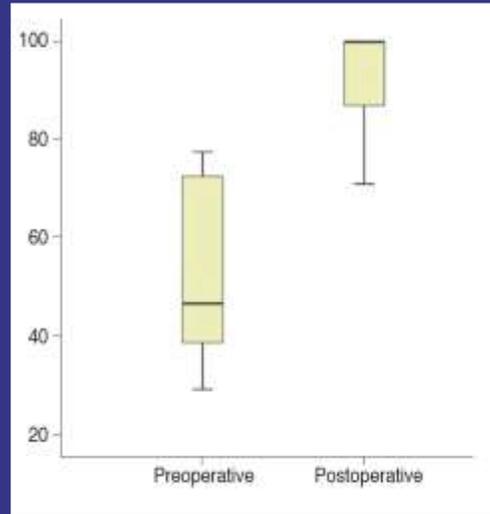

In MGD

OSD – MGD

Treatment

▶ IPL + MG expression

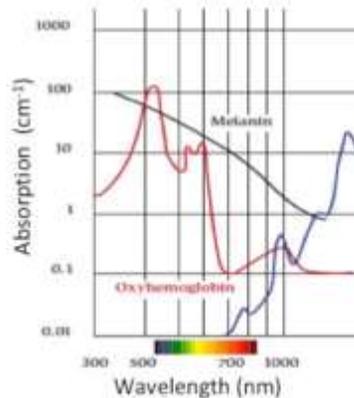

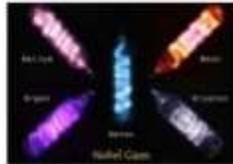

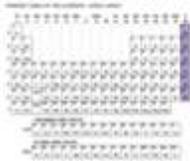

- ▶ 193 patients over 2 years
- ▶ 3 biweekly IPL sessions + MG expression
- ▶ Mean pre-operative LLT
 43.7 ± 23.3
- ▶ Mean post-operative LLT
 91.6 ± 16.1
- ▶ $P < 0.001$

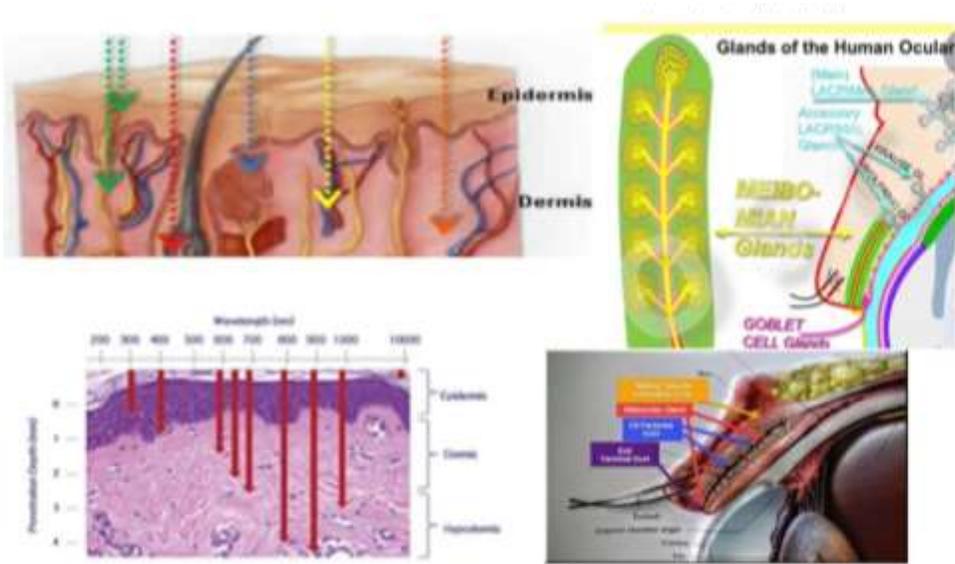

Change in LLT after IPL and MG expression

How IPL Works

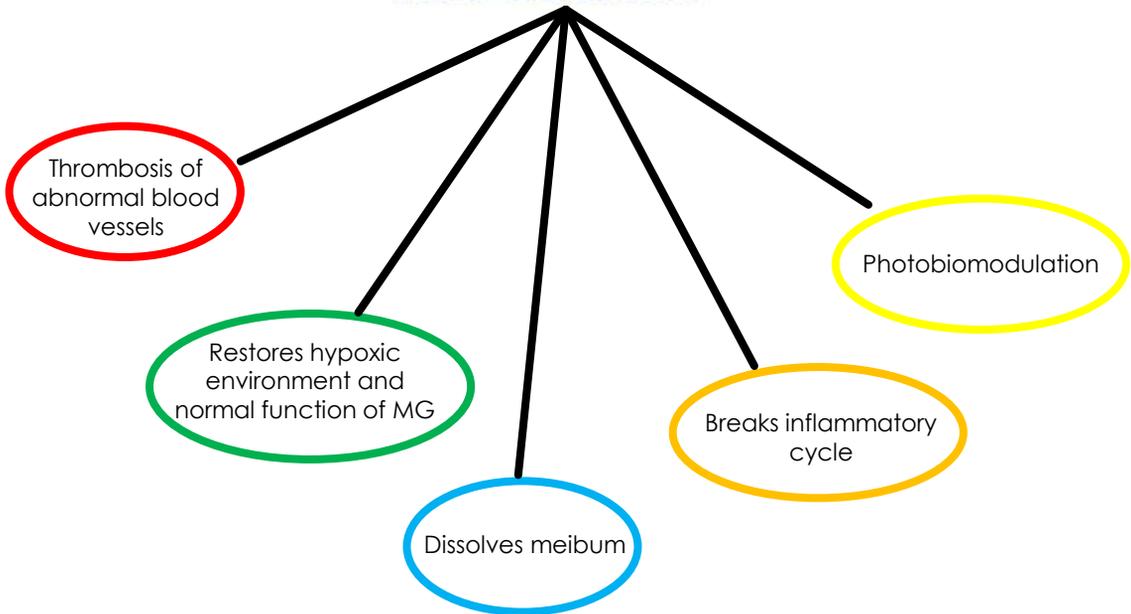

- A Xenon flashlamp
- Broad Band of Light: 500-1000nm
- Cut Off Filter
- Light is pulsed in milliseconds
- Fluence 10 to 30 Joules/cm²

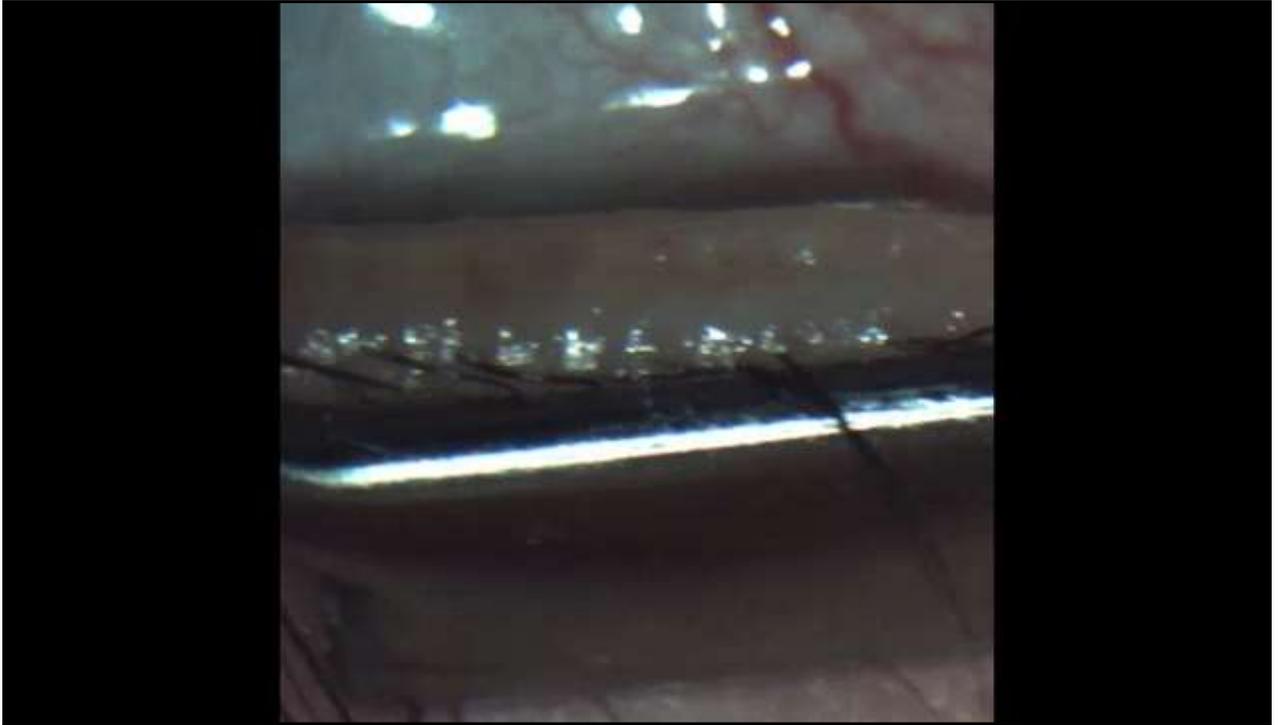

How IPL Works

How IPL Works

..... thank you
