

AUTOLOGOUS RETINAL TRANSPLANT FOR MYOPIC MACULAR HOLE RETINAL DETACHMENT

Amin Nawar, MD, FICO, FRCS

Lecturer of Ophthalmology
Vitreoretinal Surgeon
Tanta University

Amin Nawar, MD, FRCS PPV for myopic macular hole RD

Take home message

1-Myopic macular hole RD is a challenging situation during vitrectomy.

2-Tight posterior hyaloid and difficult PVD induction with high incidence of iatrogenic retinal breaks represent major surgical challenges.

3- Difficult visualisation of the ILM makes ILM peeling in high myopia very difficult.

4-ART is a skill that all VR surgeons should master to manage myopic macular holes with difficult ILM peeling.
