In collaboration with:

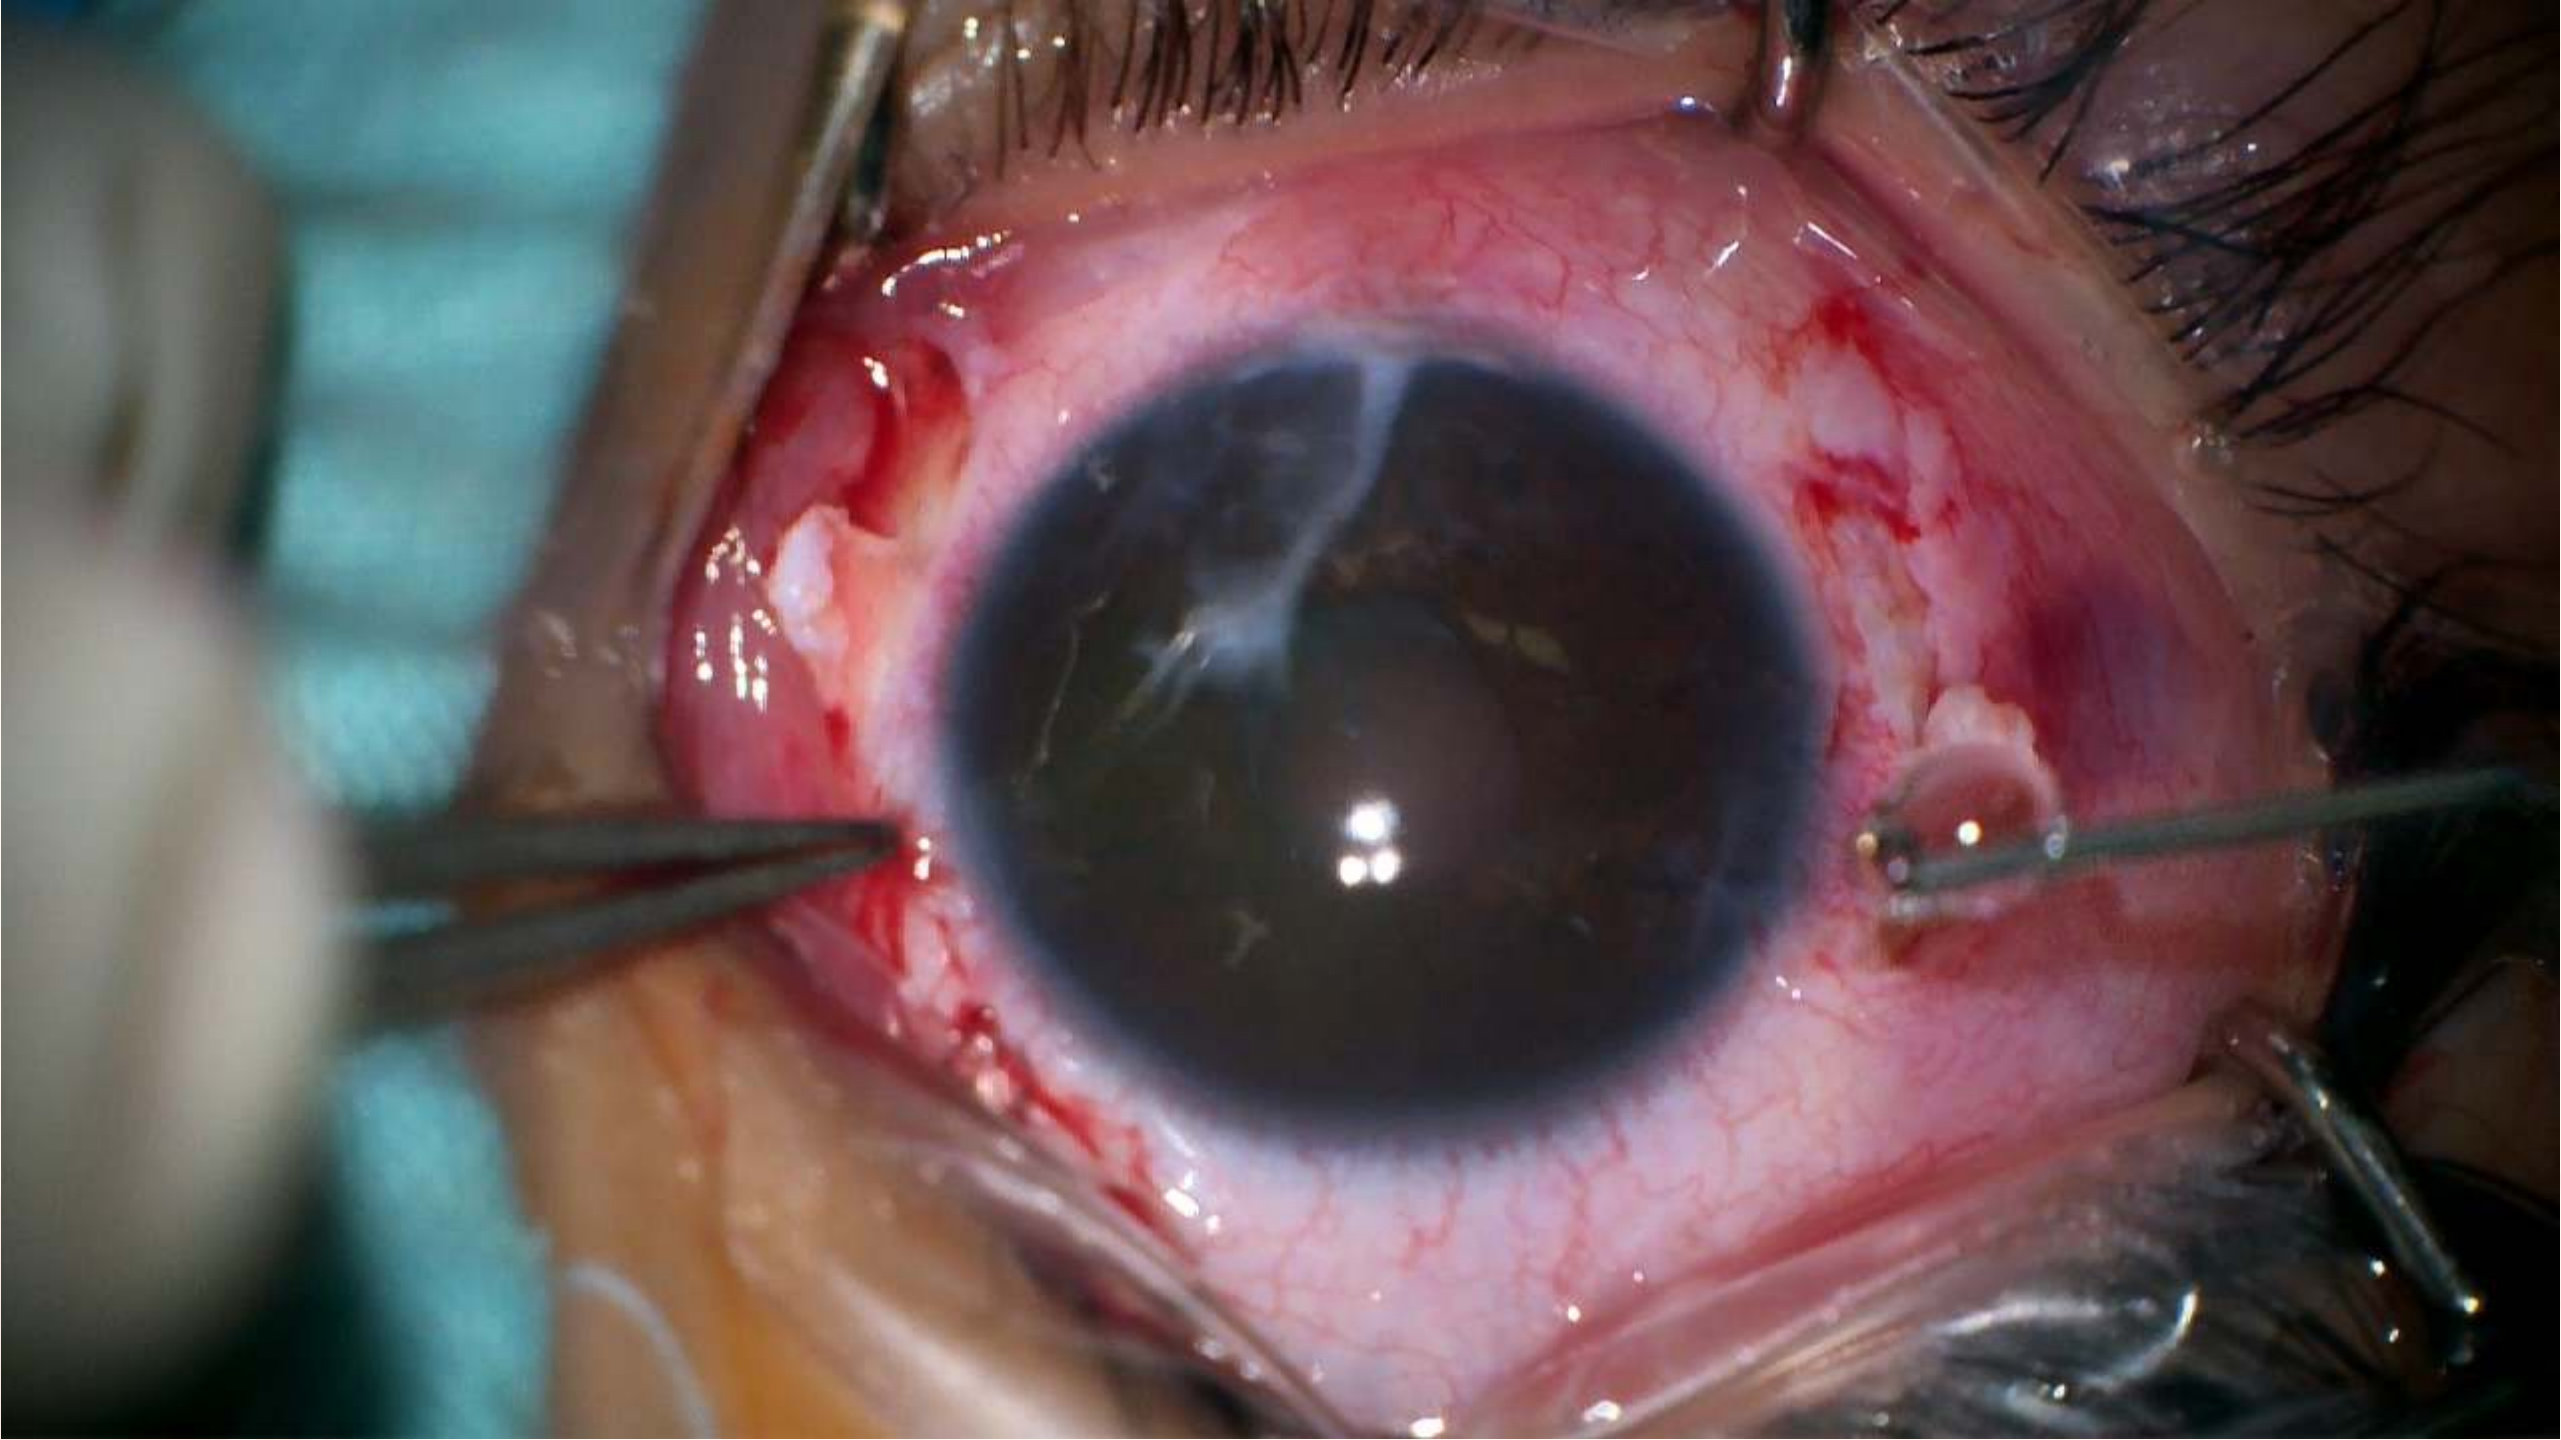

MEACO
MIDDLE EAST AFRICA
COUNCIL OF OPHTHALMOLOGY

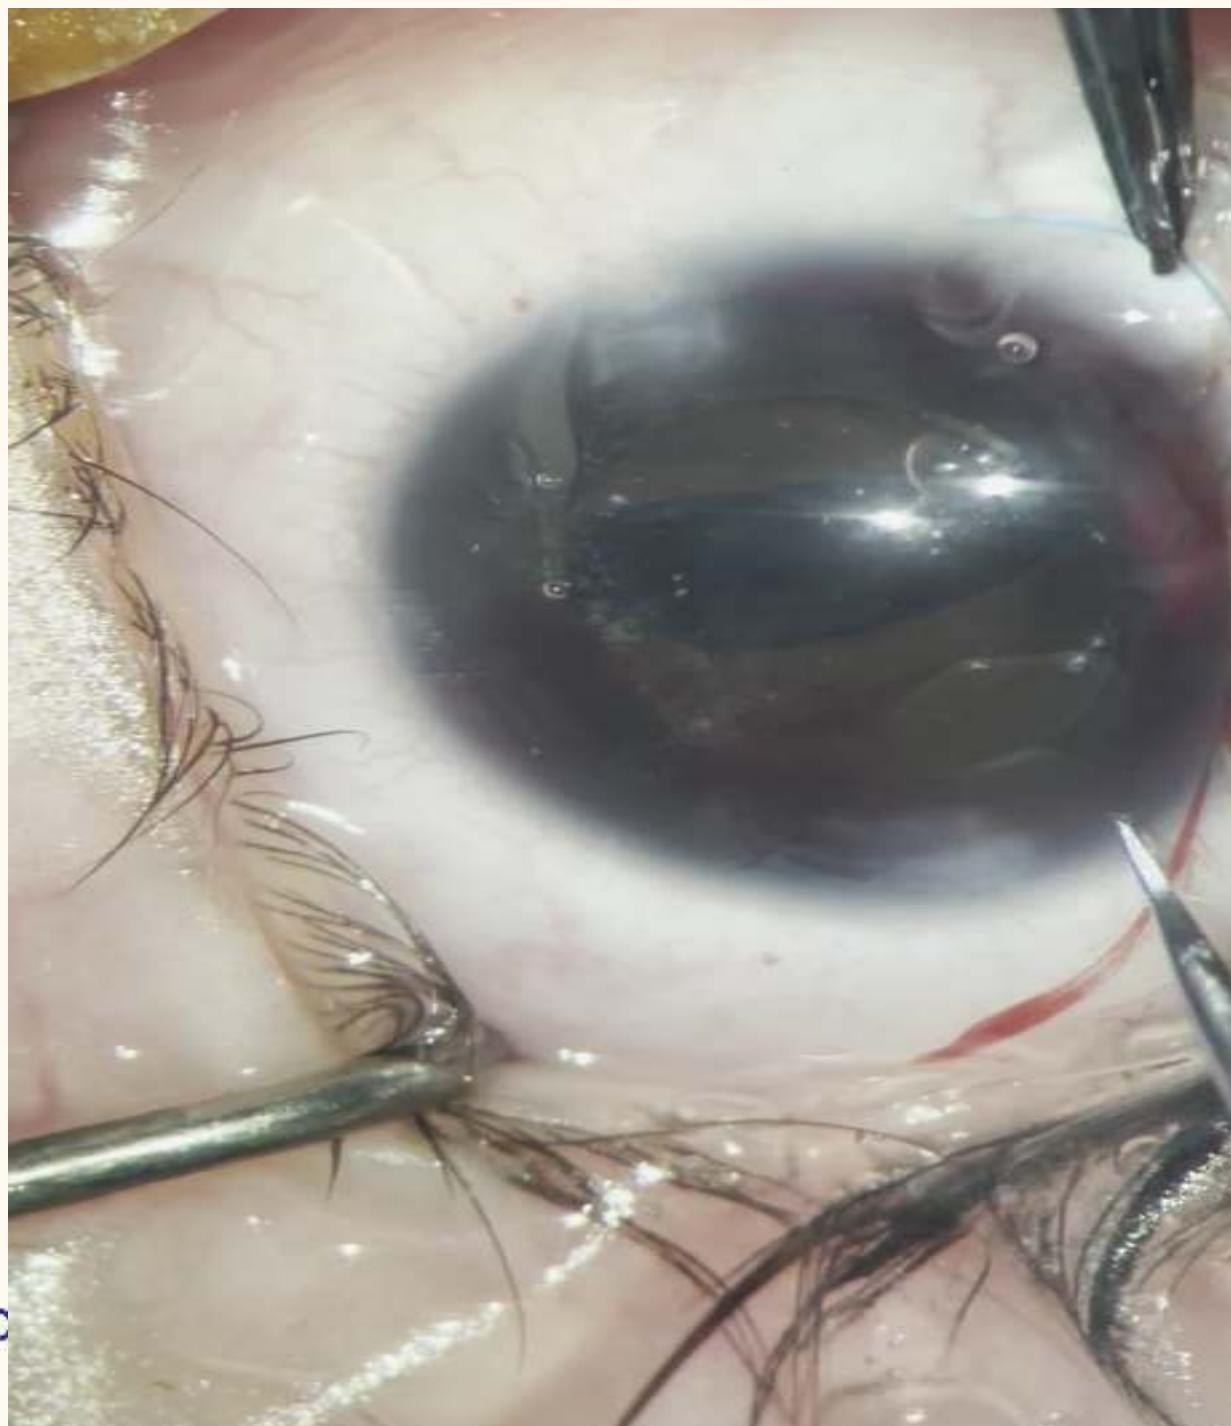

Secondary IOL Implantation in sulcus

Shireen Mostafa Shousha , MD

A.Professor of ophthalmology , Cairo university

- Put your plan : **Rim evaluation** , in doubt be prepared by your scleral fixation plan / iris claw lens .
- **Good gentle** synchoilysis till you free the sulcus without endangering the rim.
- Make sure **no** vitreous strands
- IOL loading , injection (**trailing haptic looking to the right**)
- **Anterior chamber entry** then push the leading haptic , optic till you feel safe then the trailing haptic .
- **Good AC wash** , wound closure ; watertight .

Thank You
