The future of glaucoma surgery

Norbert Pfeiffer

Department of Ophthalmology, Mainz
University Medical Center, Germany

Who will need surgery in the future?

Who will need surgery in the future?

- “All glaucoma patients should have glaucoma surgery ”.

Heinrich Harms, 1975

Who will need surgery in the future?

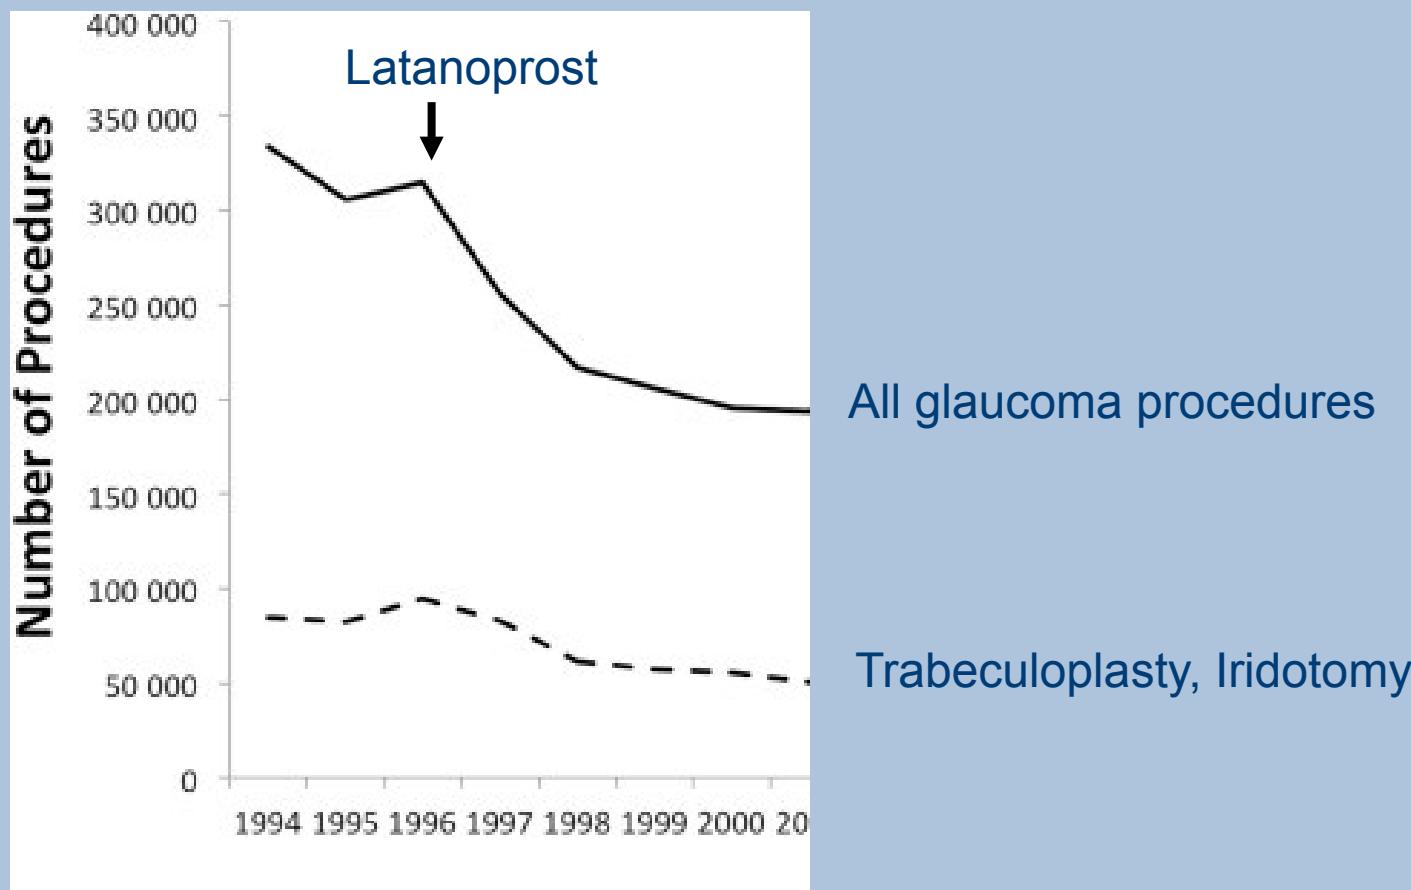

- “All glaucoma patients should have glaucoma surgery if there were the ideal glaucoma surgery“.

Heinrich Harms, 1975

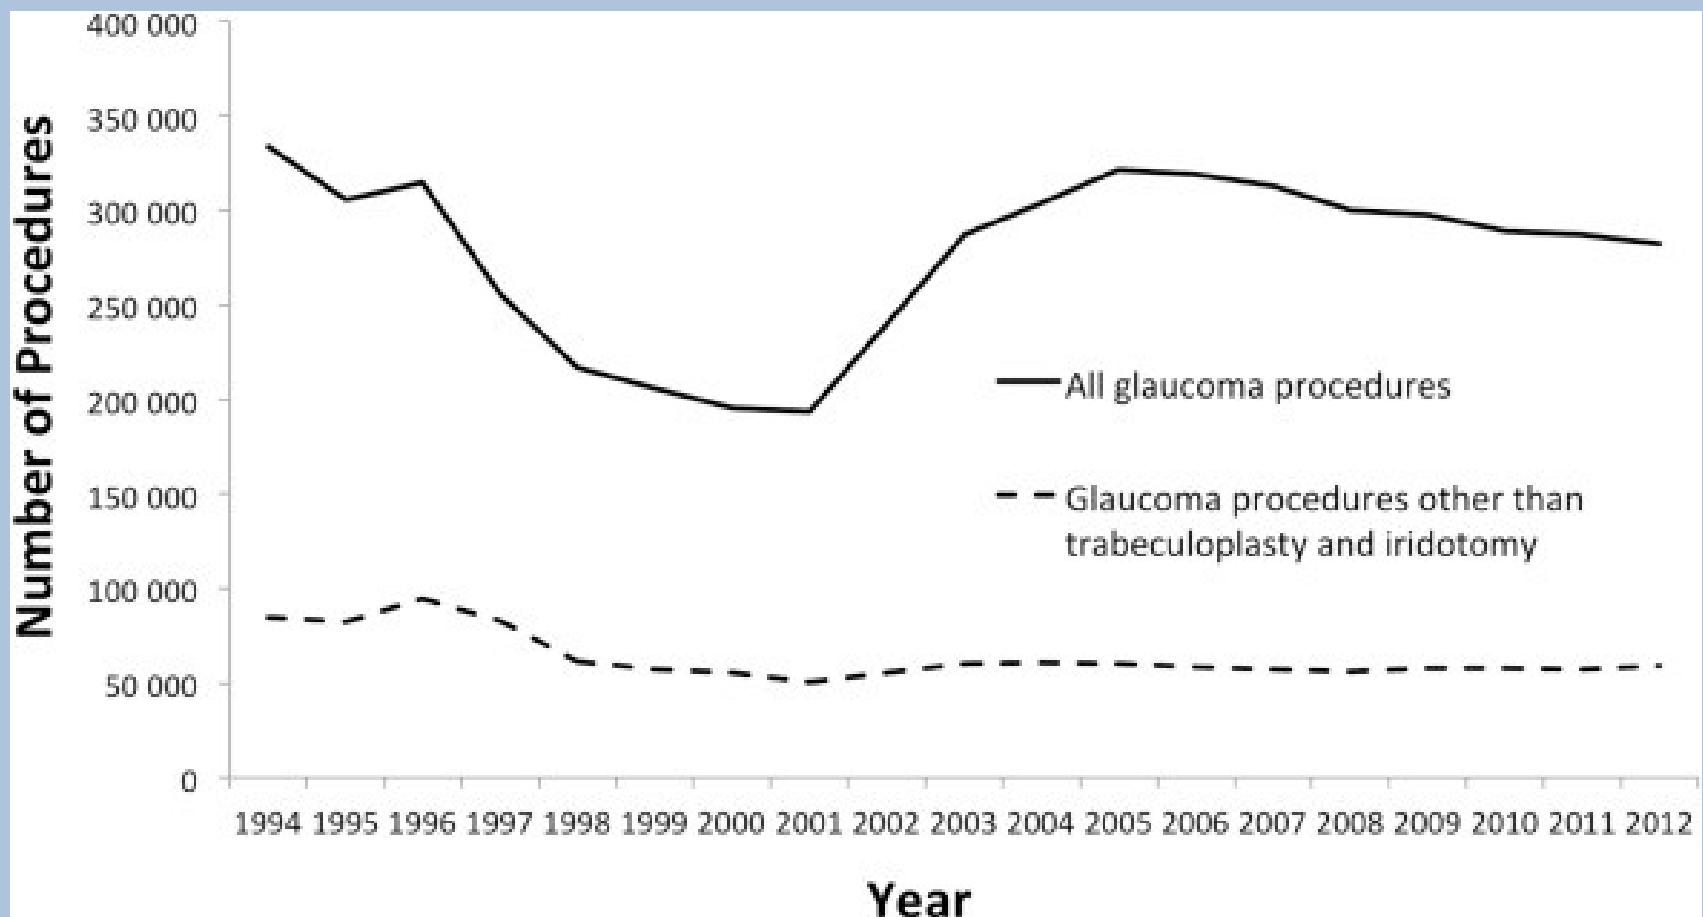

Hypothesis 1

- Number of glaucoma surgeries is going to increase

Ramulu et al., 2007 Glaucoma Surgery, USA

Ramulu et al., 2007 Glaucoma Surgery, USA

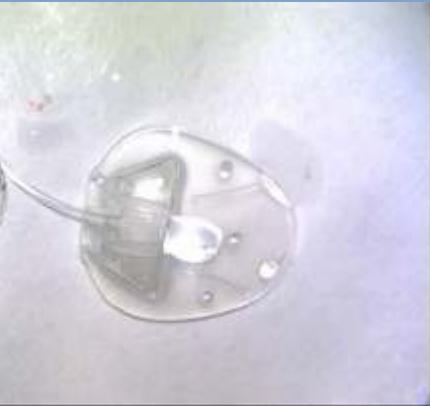

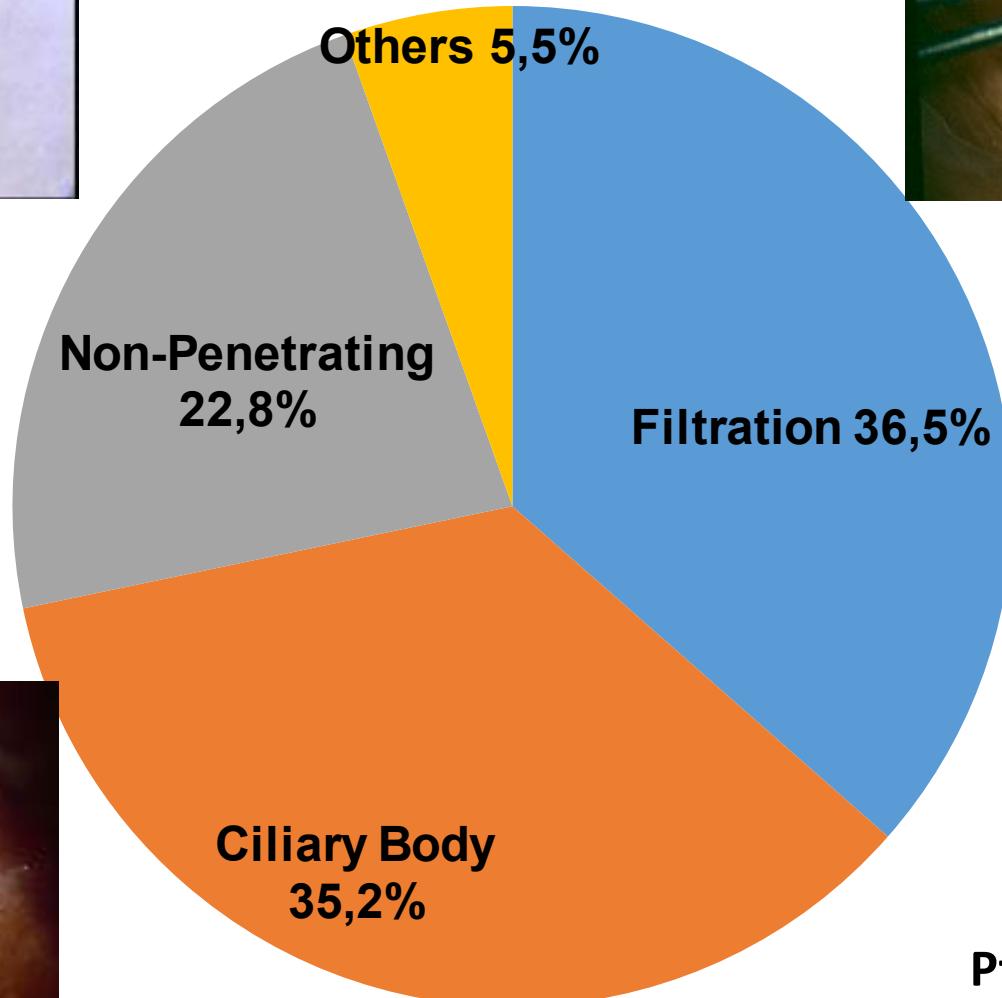

In Germany: More Glaucoma surgery

2005 27.208

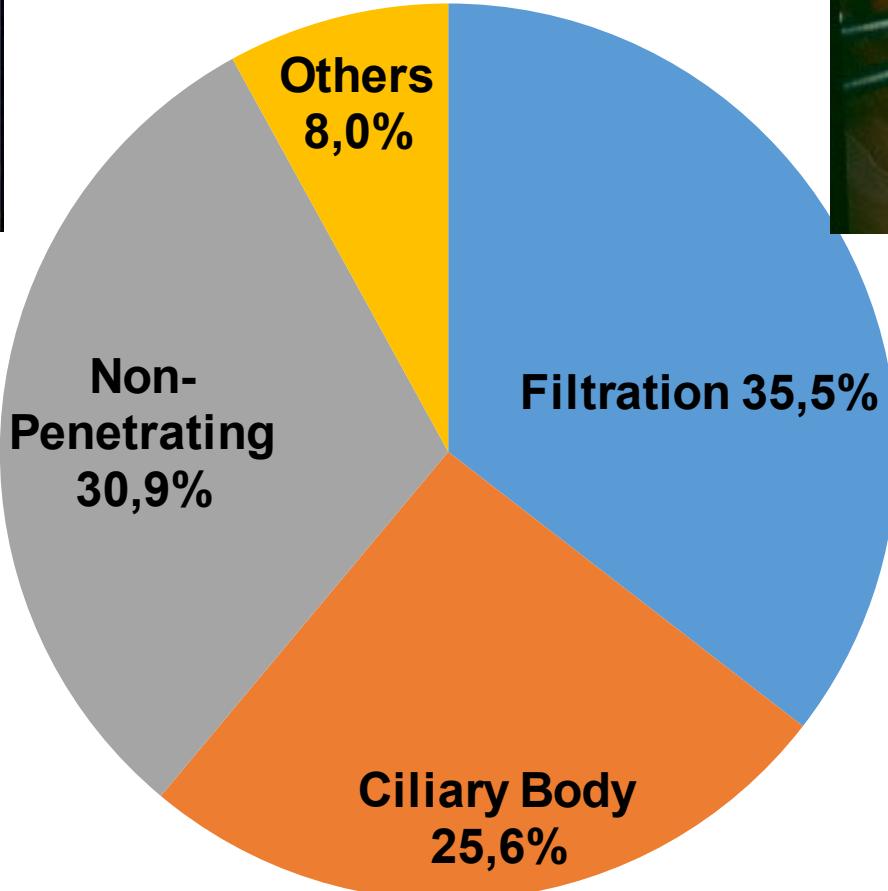

+ 50,2 %

2012 40.865

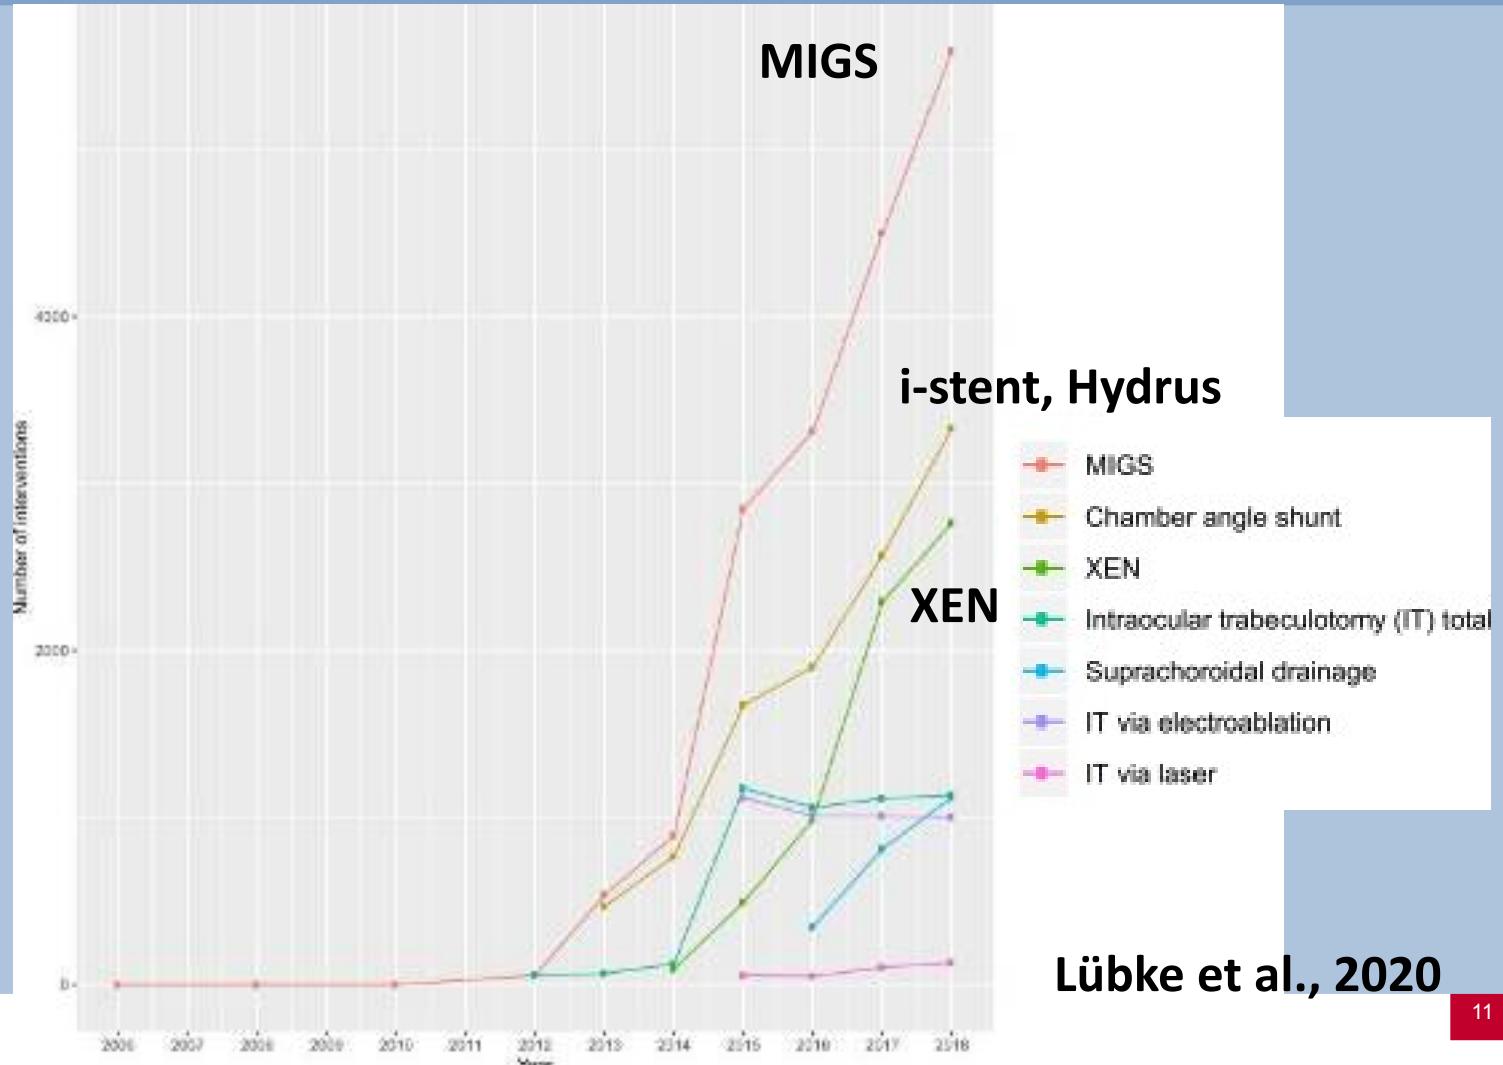

Glaucoma surgeries in Germany 2005

Glaucoma surgeries in Germany 2012

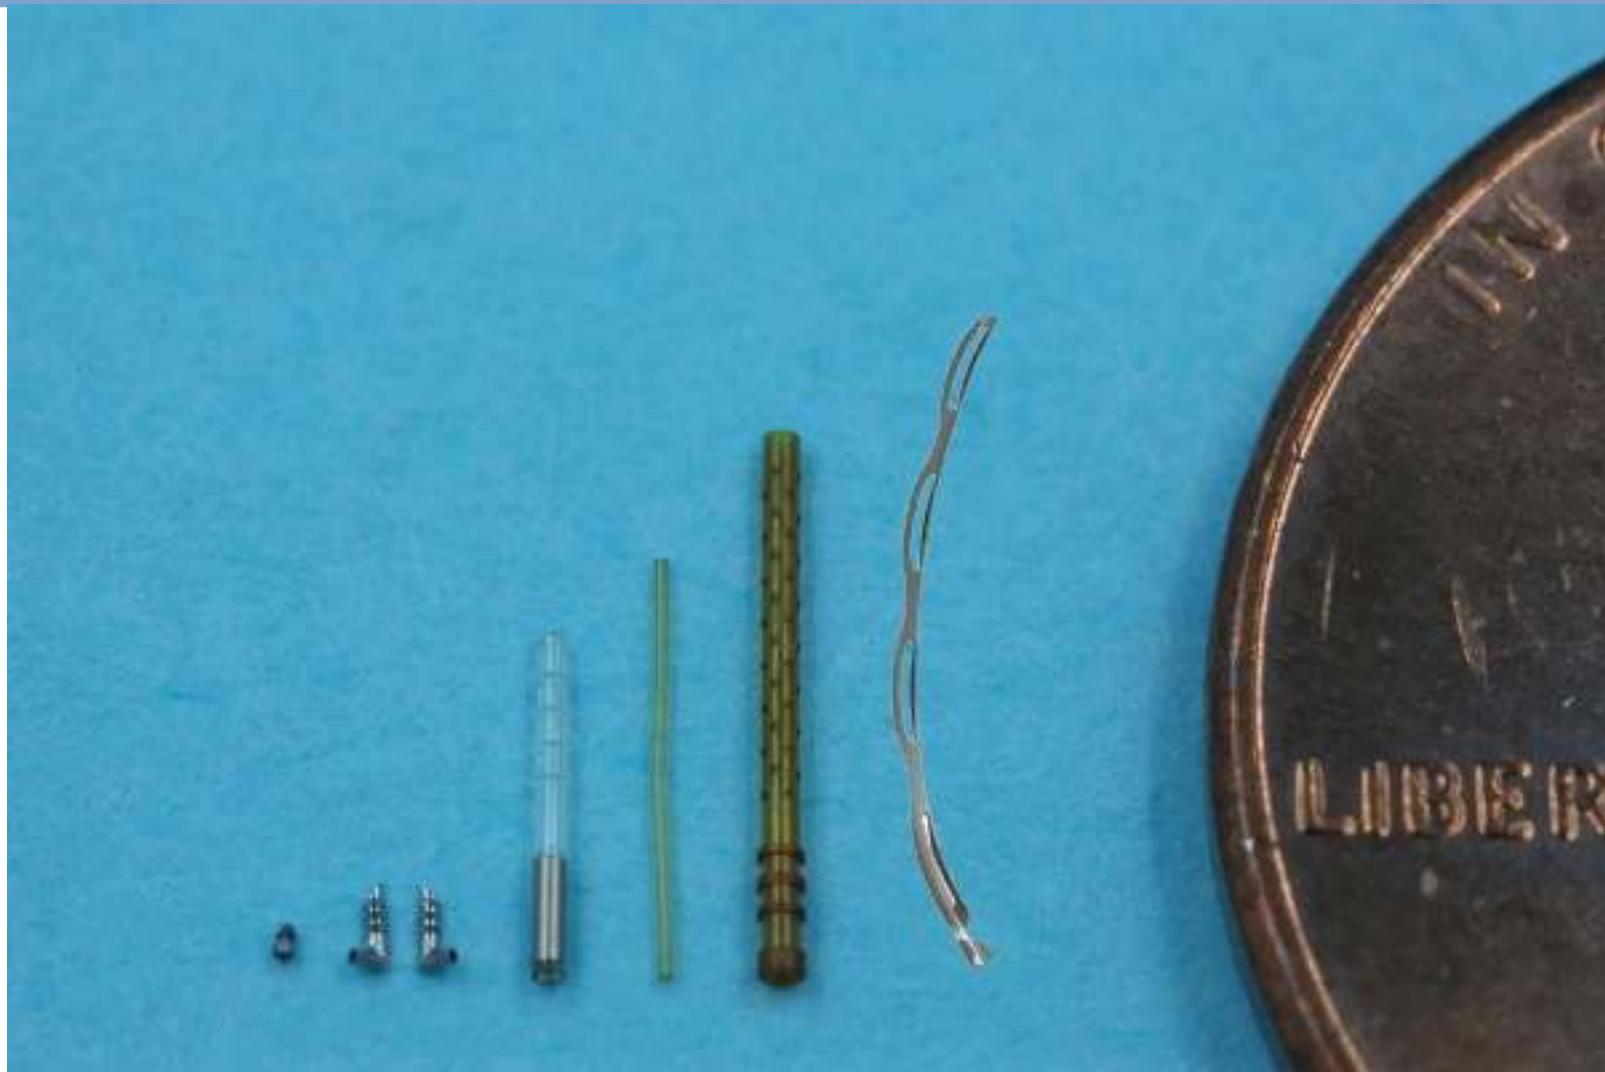

Trends in Glaucoma Surgeries Germany

Hypothesis 2

- Surgeries perceived as „lighter“ or „minor“ will increase
- Reimbursement will play major role

“Small tubes” for MIGS-Procedures

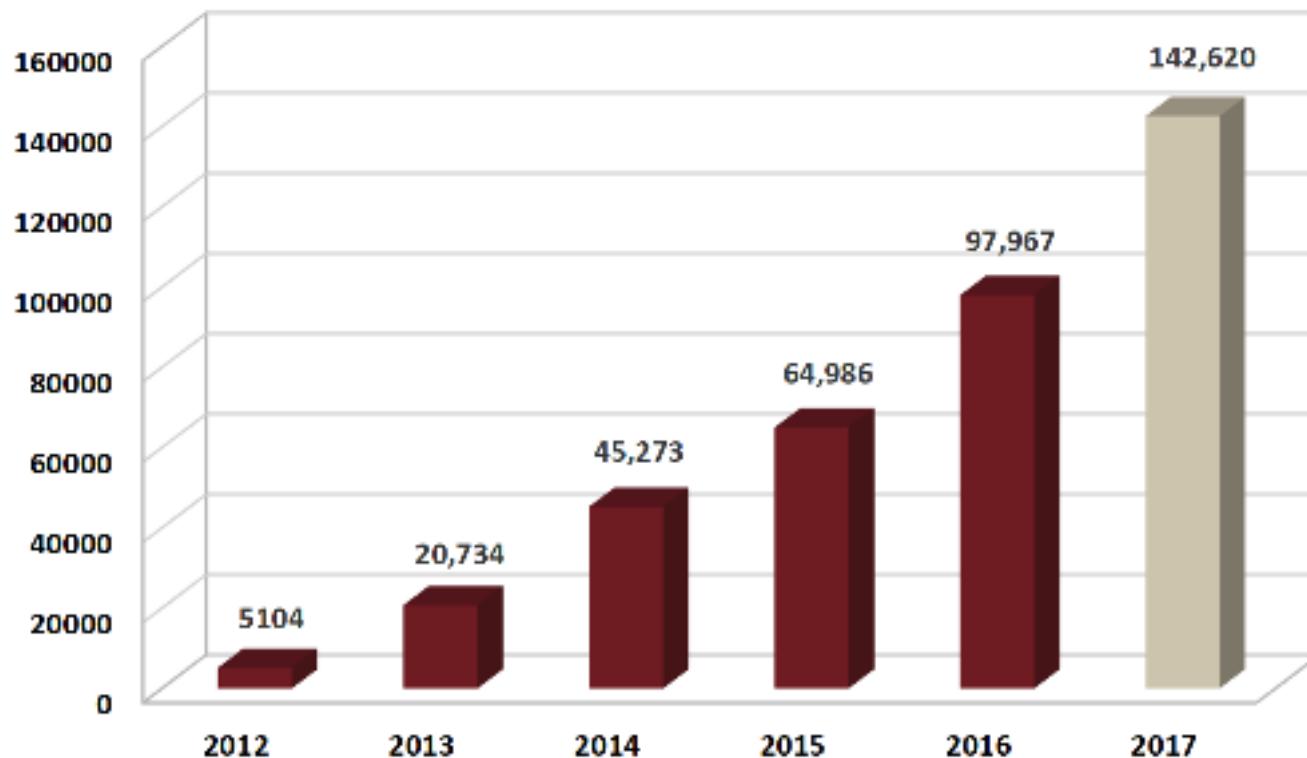

i-Stent inject

MIGS-implants in USA

Figure 48: Number of US MIGS Stents Implanted by Year

Source: Market Scope's Survey of US Glaucoma Surgeons

Phaco plus i-Stent vs phaco alone

| Treatment | Mean IOP-reduction (mmHg) | Mean Medications (n) |
|---------------|---------------------------|----------------------|
| Phako + stent | 8.4 +/- 4.3 | 0.2 +/- 0.6 |
| | | |

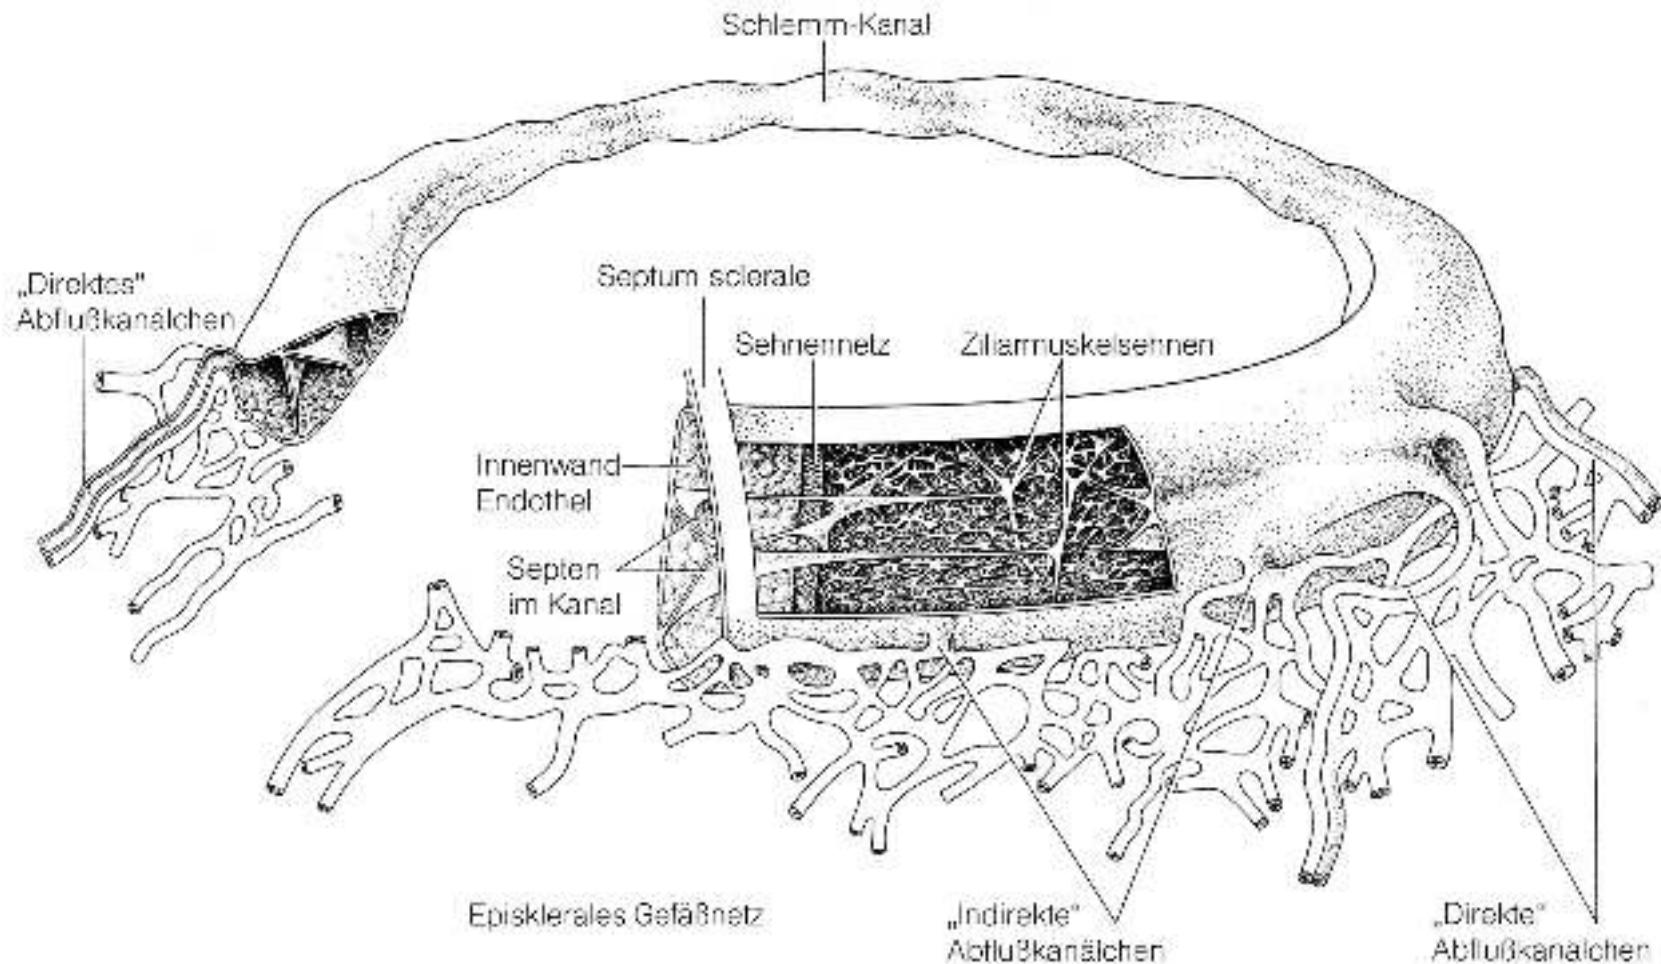

Phaco plus i-Stent vs phaco alone

| Treatment | Mean IOP-reduction (mmHg) | Mean Medications (n) |
|---------------|---------------------------|----------------------|
| Phako + stent | 8.4 +/- 4.3 | 0.2 +/- 0.6 |
| Phako alone | 8.5 +/- 3.6 | 0.4 +/- 0.7 |

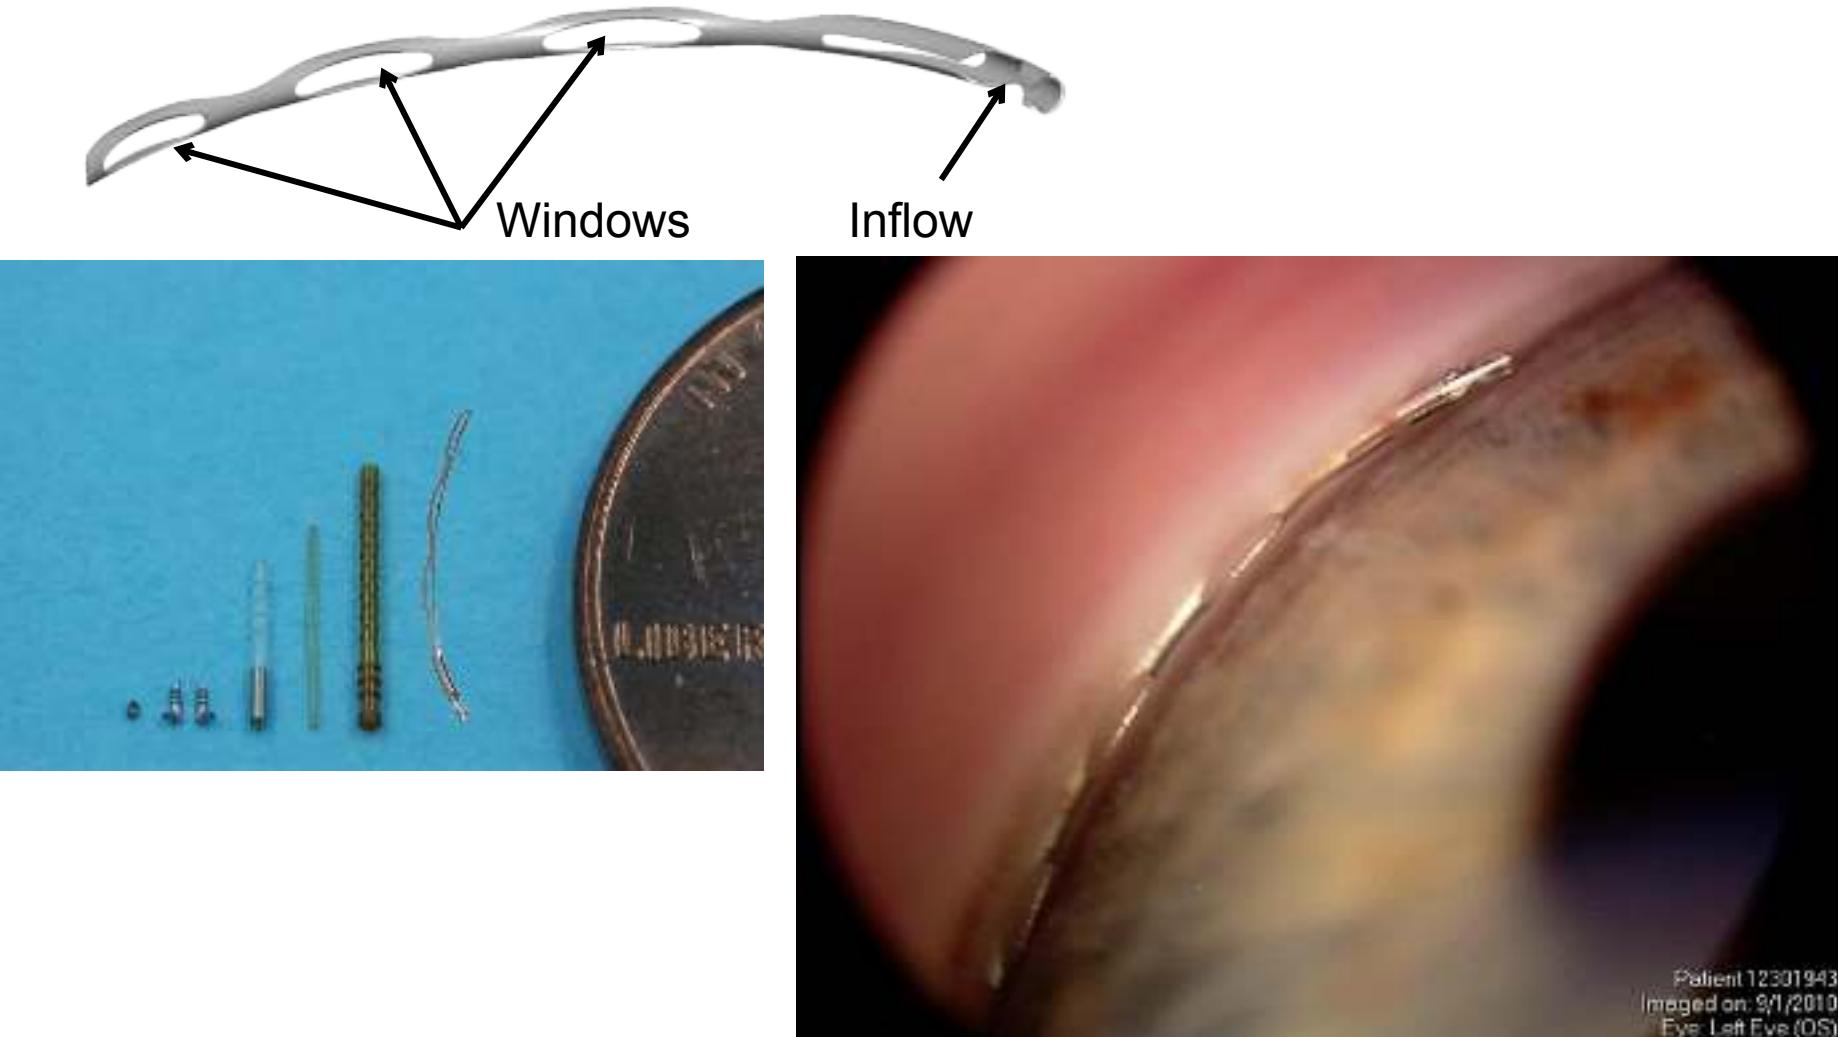

Hypothesis 3

- Surgical diagnostics will play a greater role

Why does the stent not lower IOP more?

HYDRUS Microstent

Patient 12301943
Imaged on: 9/1/2010
Eye: Left Eye (OS)

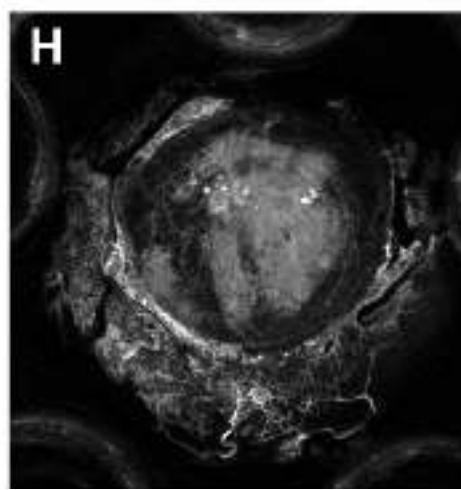

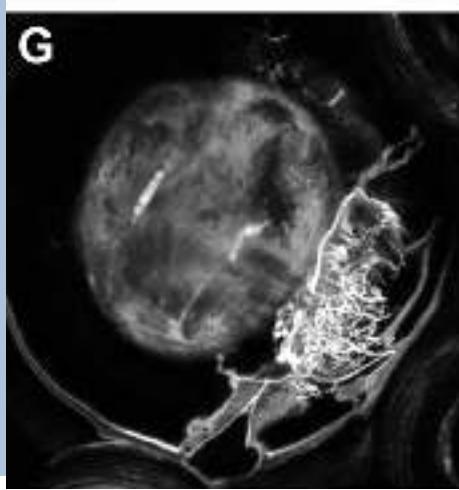

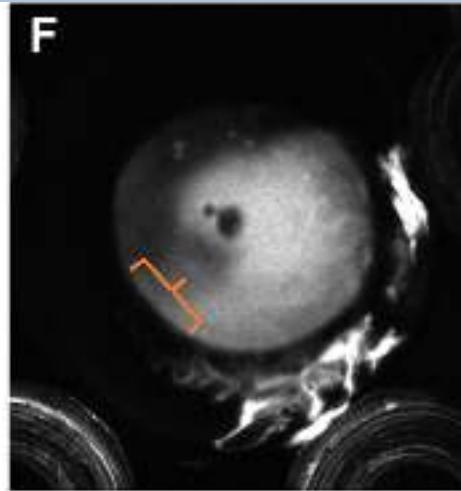

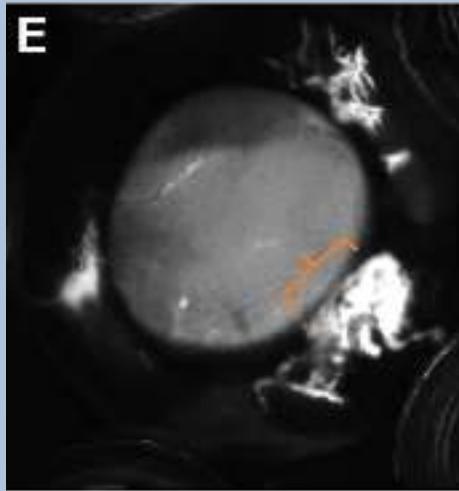

UNIVERSITÄTSmedizin.

MAINZ

Augenklinik und Poliklinik

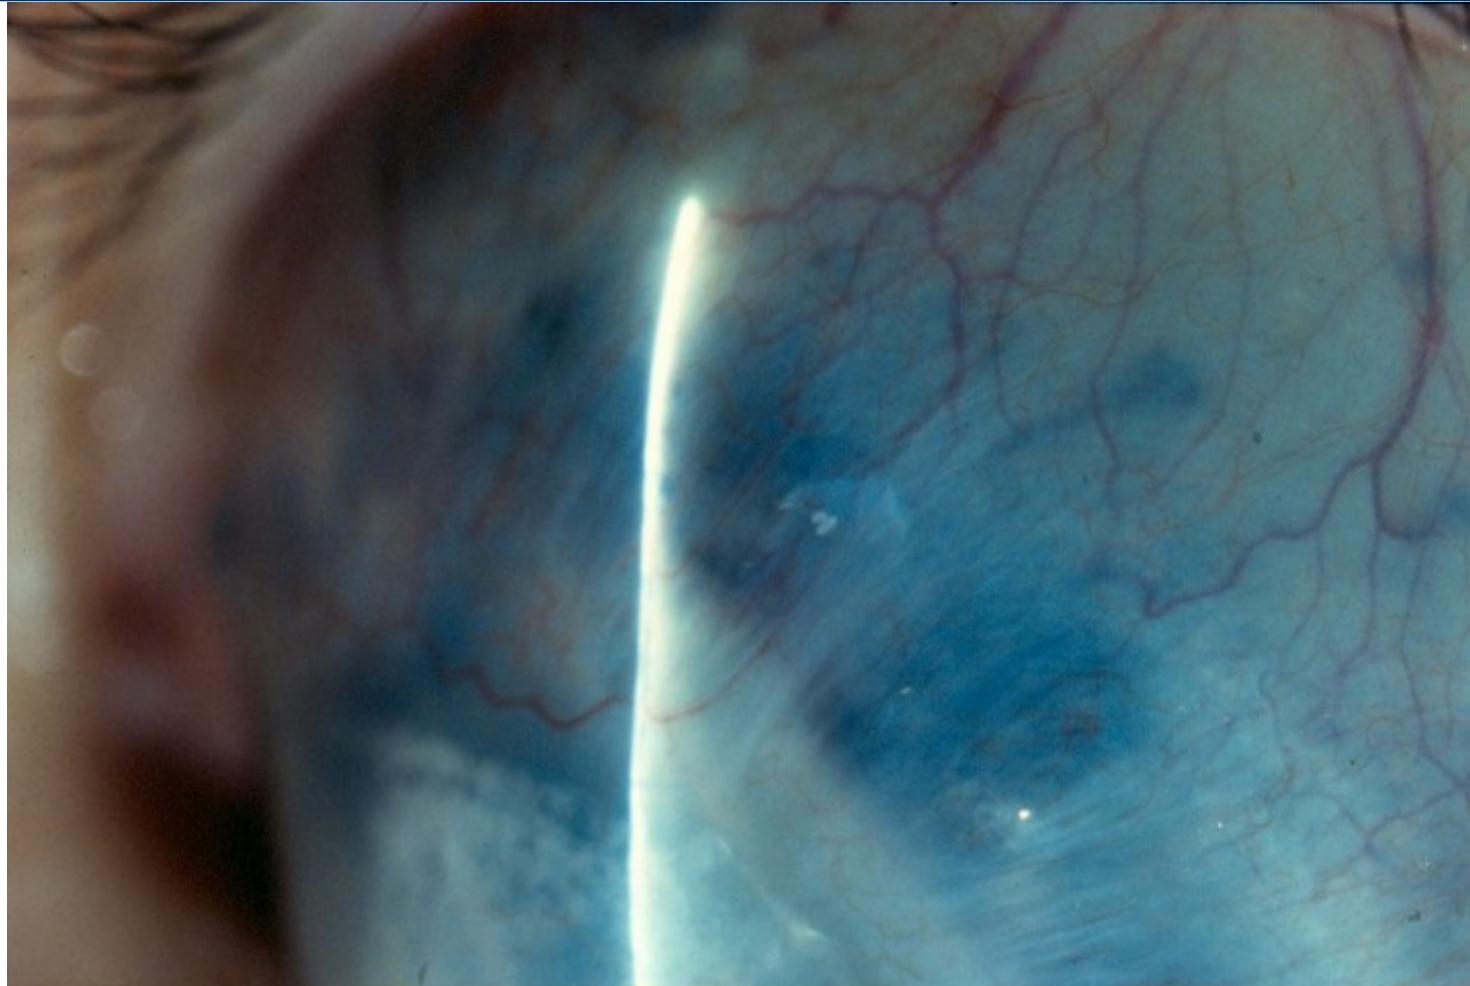

Direktor: Professor Dr. med. N. Pfeiffer

Where to put a Schlemm's canal stent?

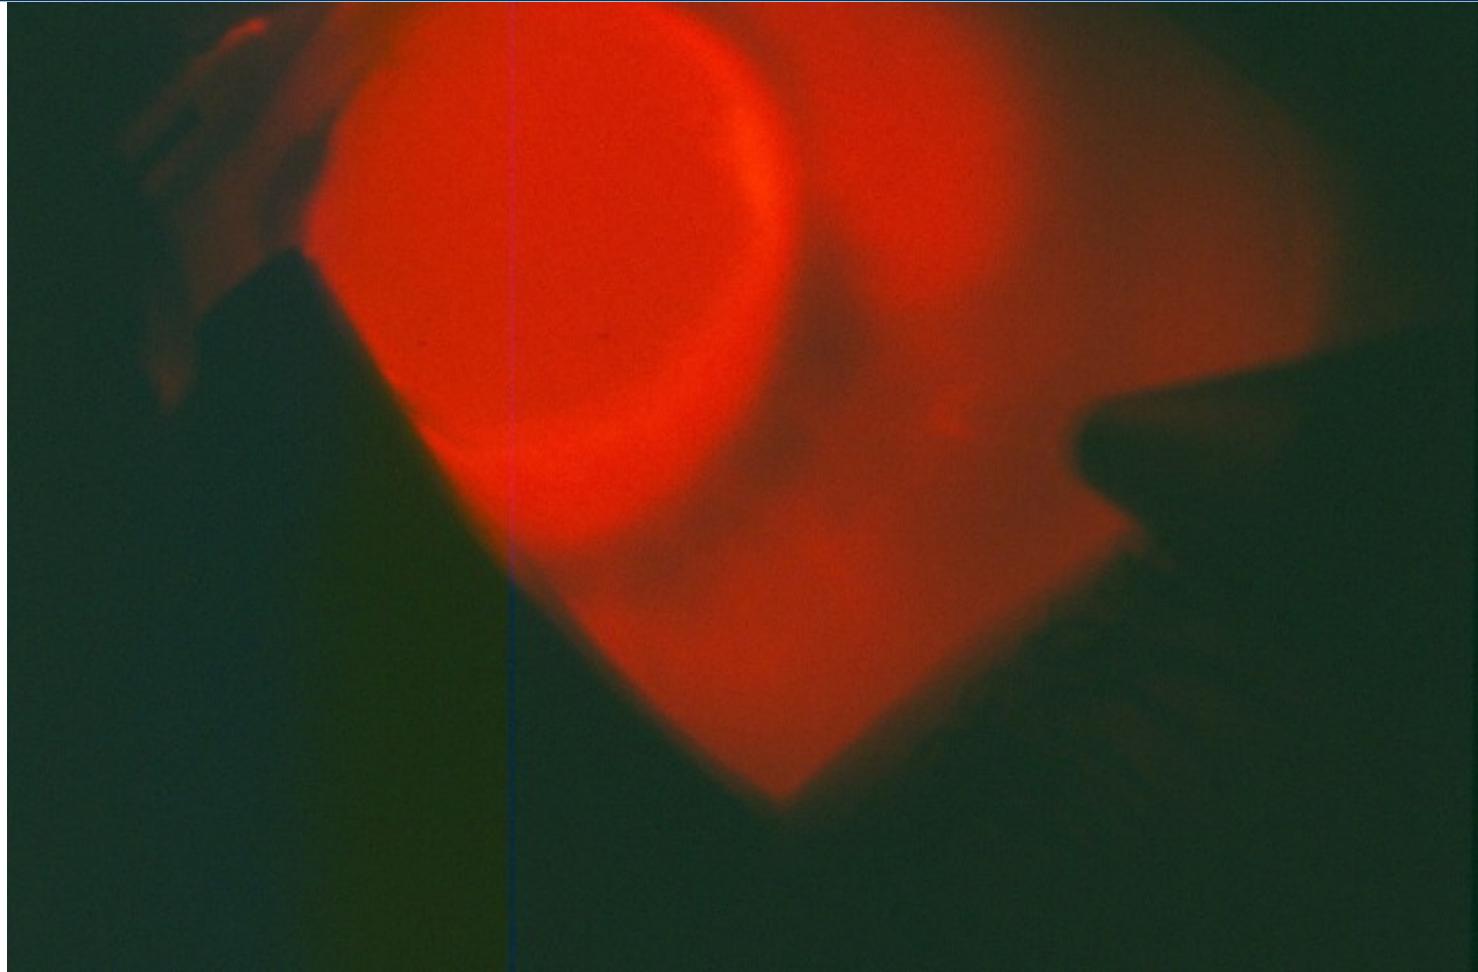

Strohmaier et al.
Ophthalmol Glaucoma, 2023

Cyclocryotherapy – Scleral thinning

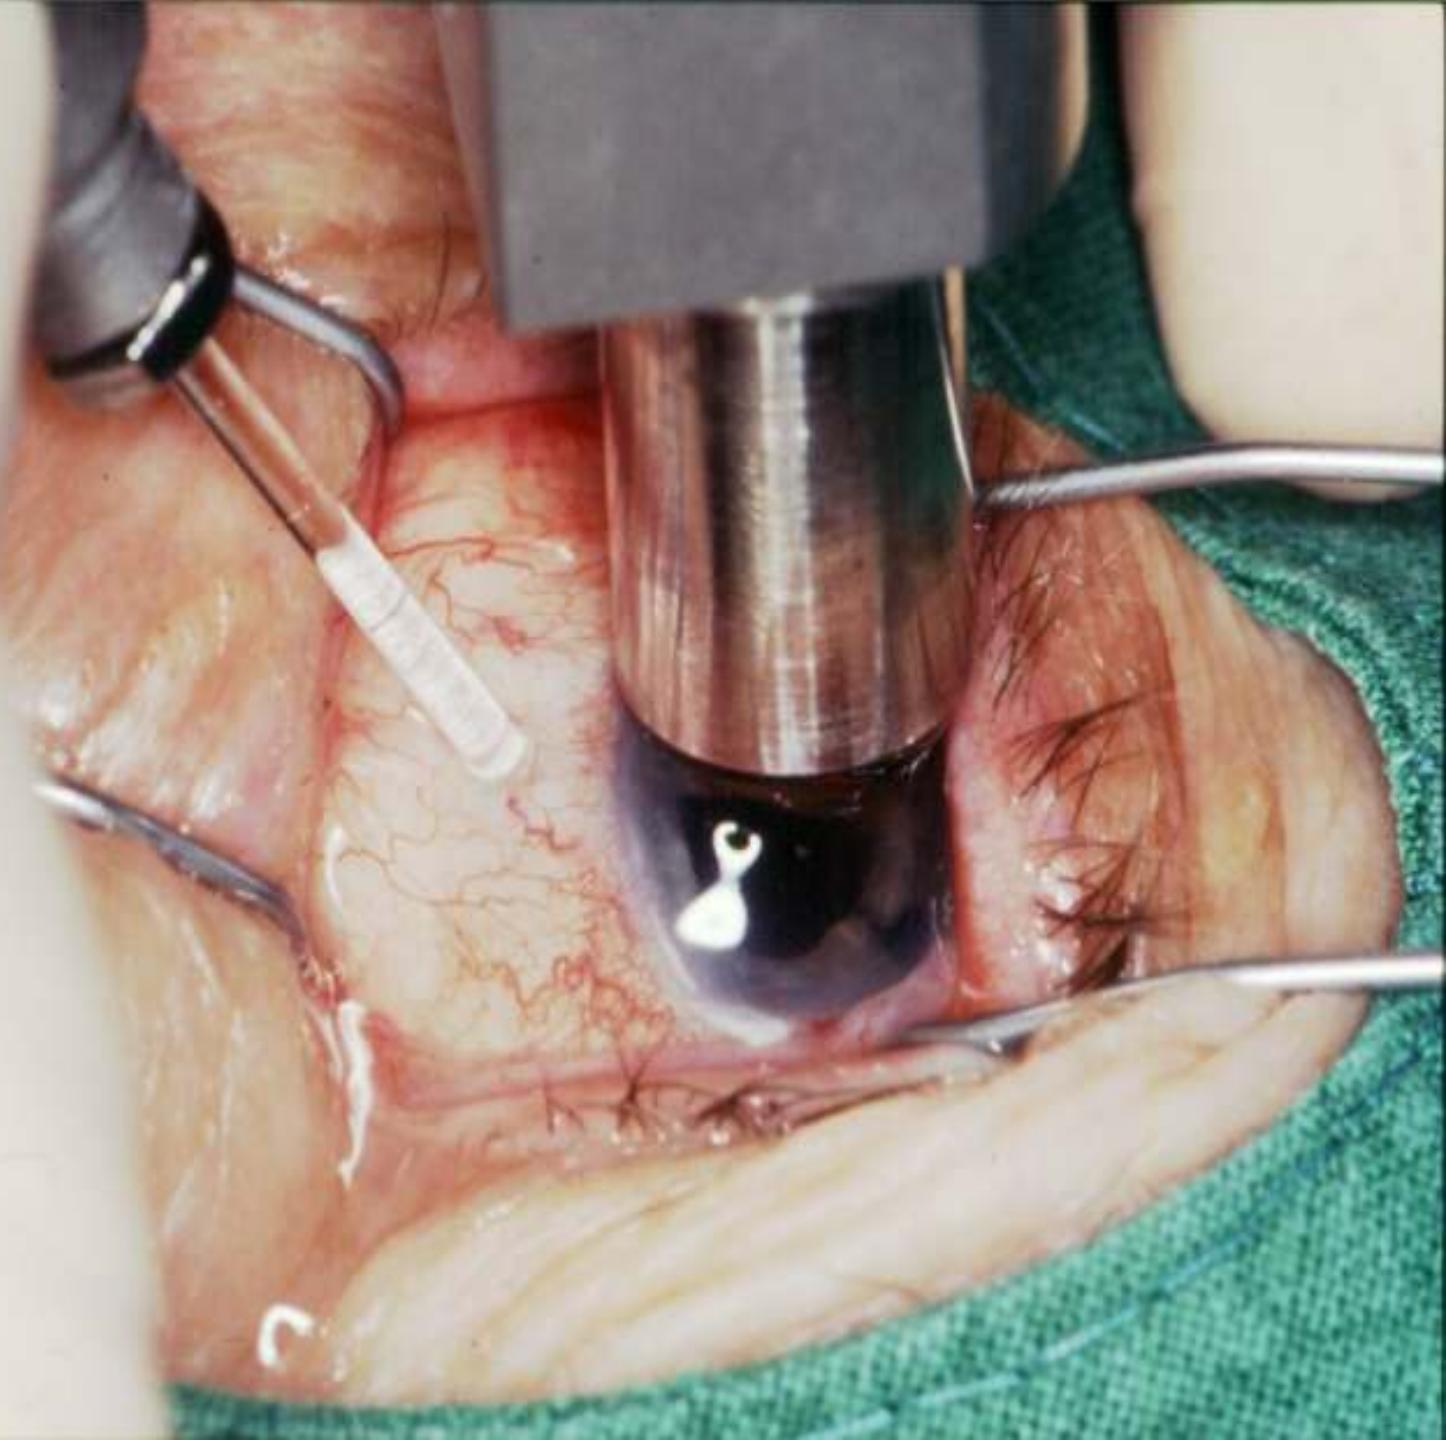

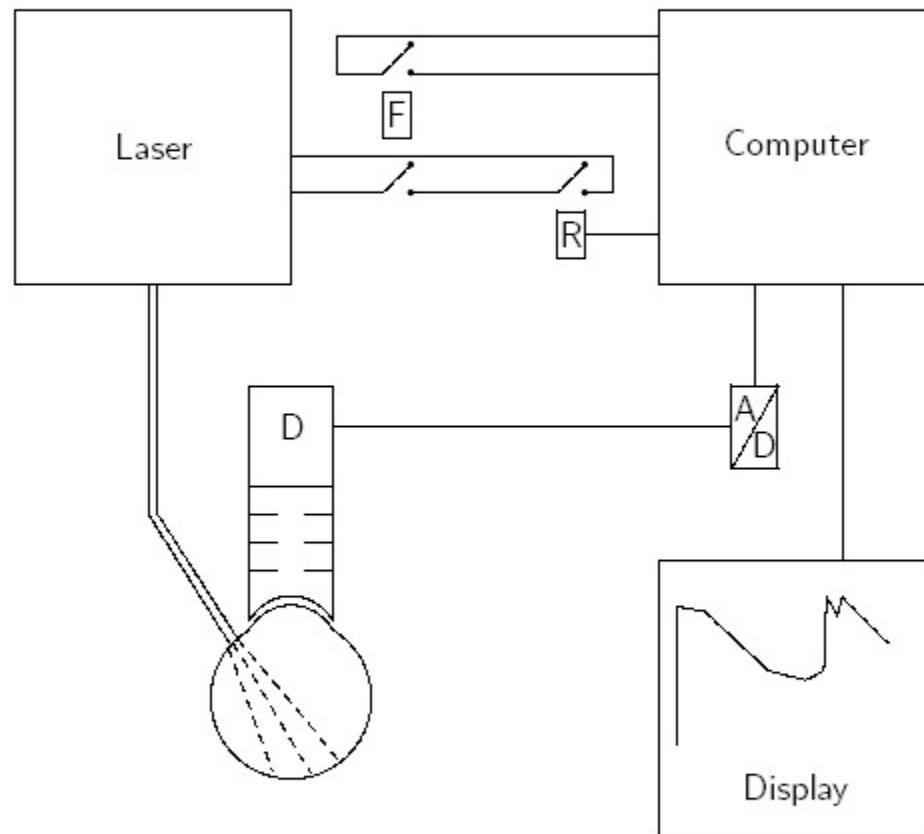

Transillumination before treatment

Cyclophotocoagulation

- Treatment of ciliary body epithelium
- Effects difficult to predict
- Intraoperative control of cyclophotocoagulation advantageous

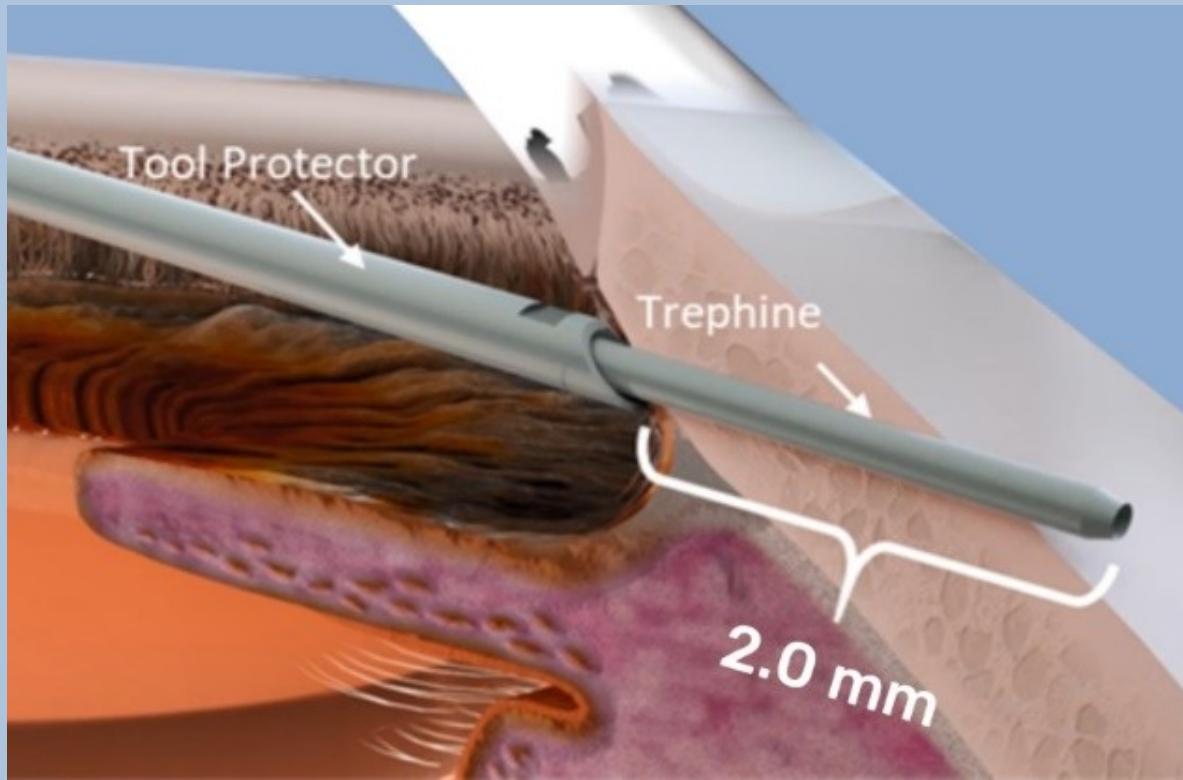

Hypothesis 4

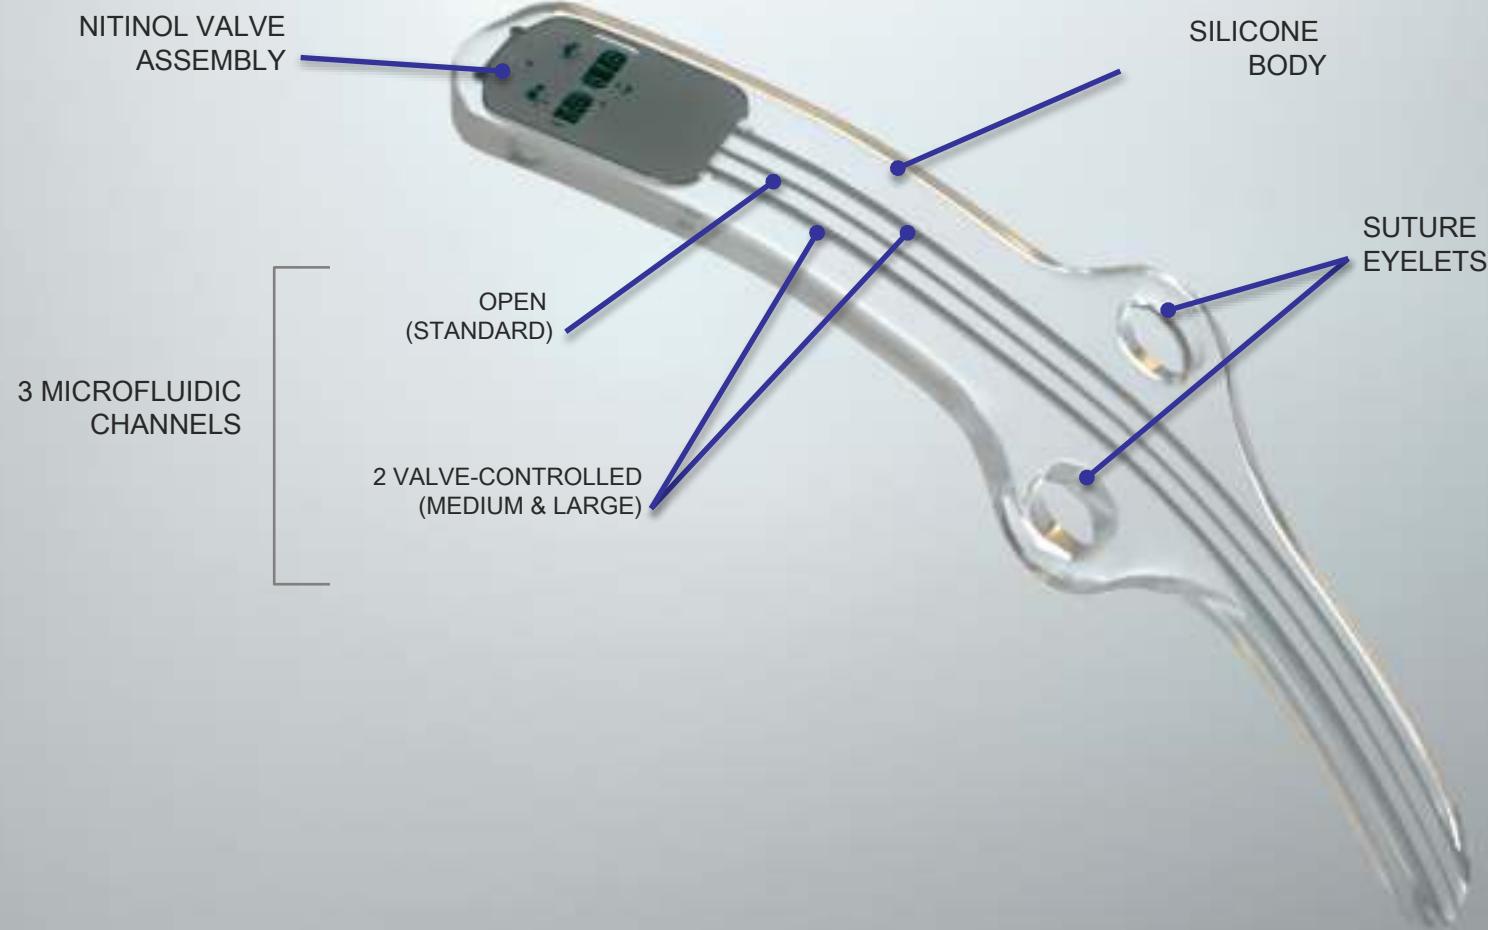

- Fistulating surgery will see revival
- If less complicated and
 - Faster
 - Adjustable
 - Self-adjusting

Faster

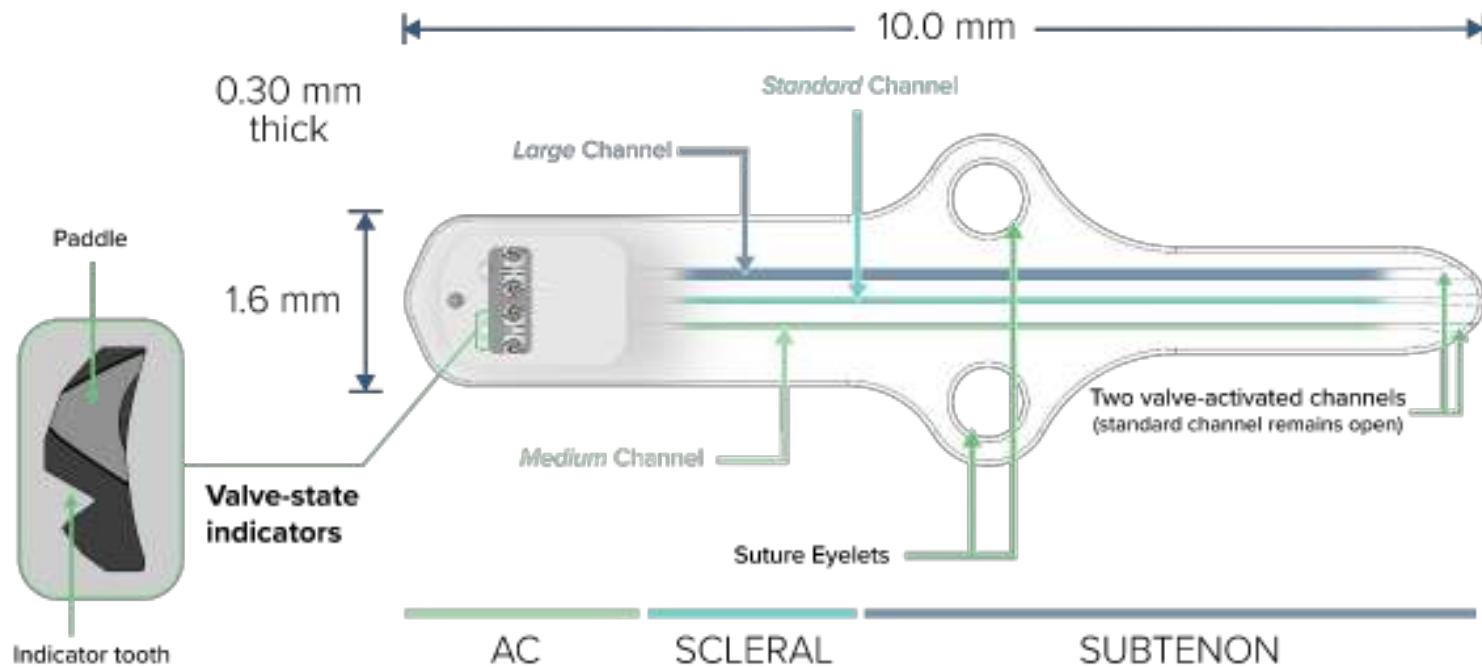

- Preserflow, Xen,

Adjustable system CALIBREYE™

Adjustable system Calibreye™

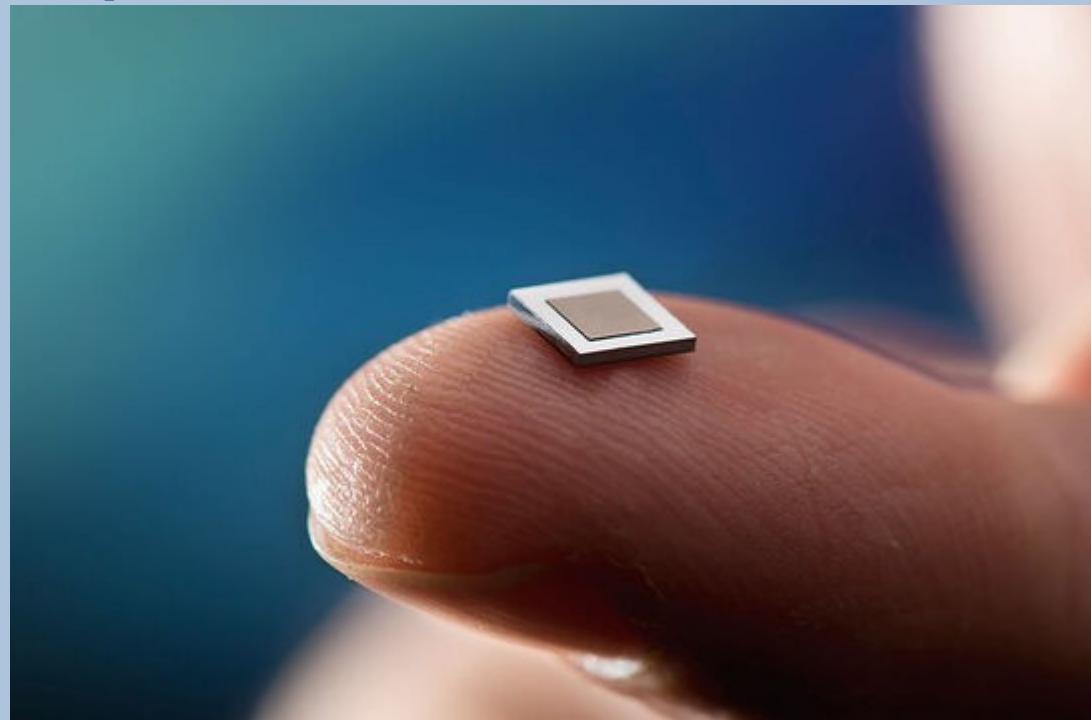

Adjustable (Rheon)

Hypothesis 5

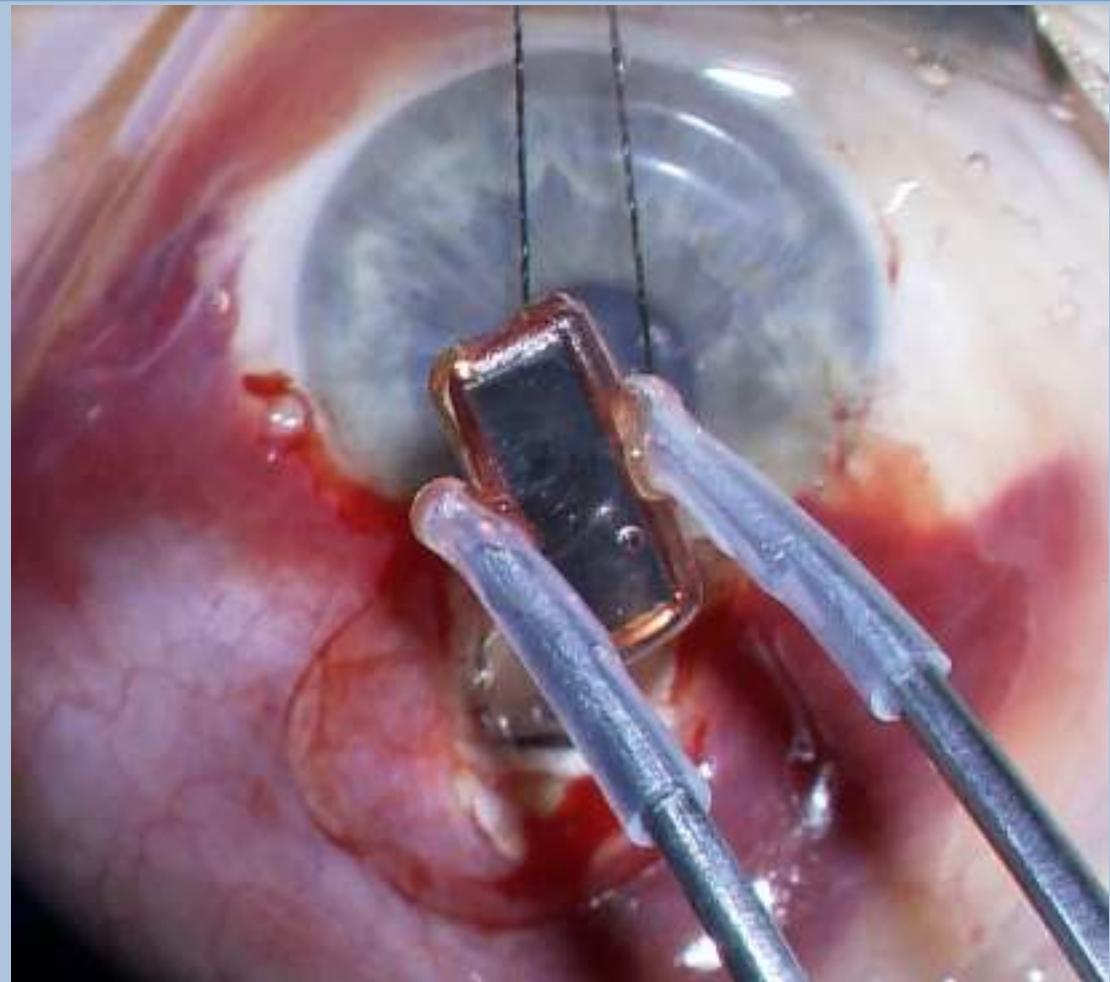

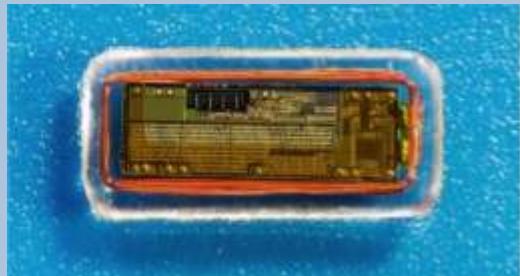

- Pumps will replace tubes

Hypothesis 6

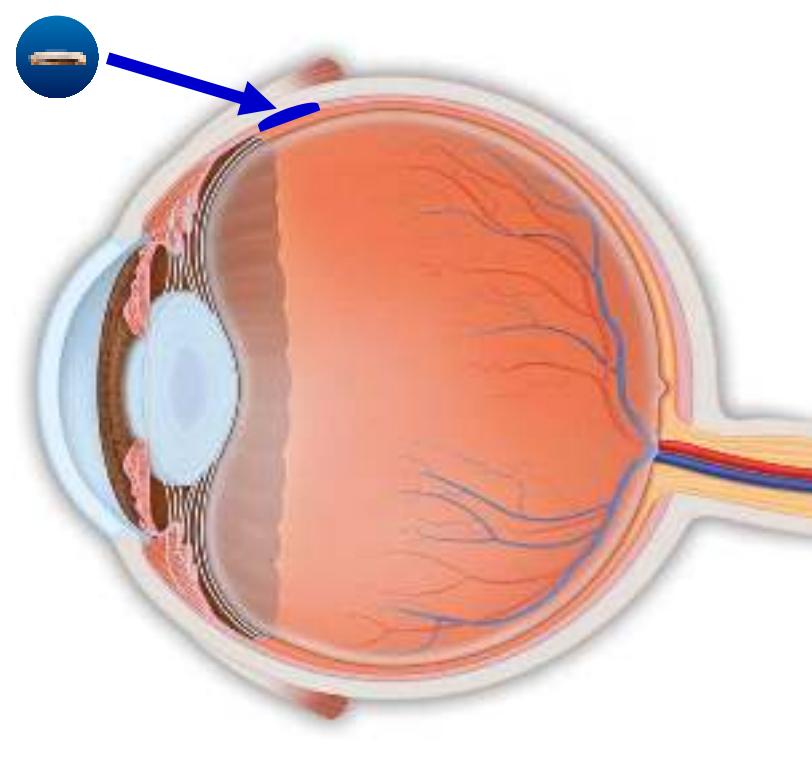

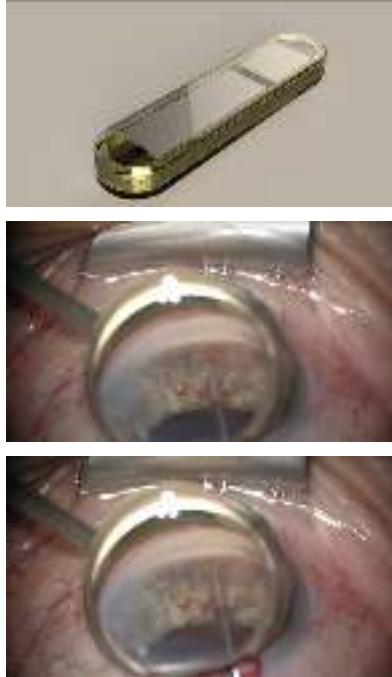

- Real time sensors will be used

Intraocular IOP sensor

Next generation IOP sensor

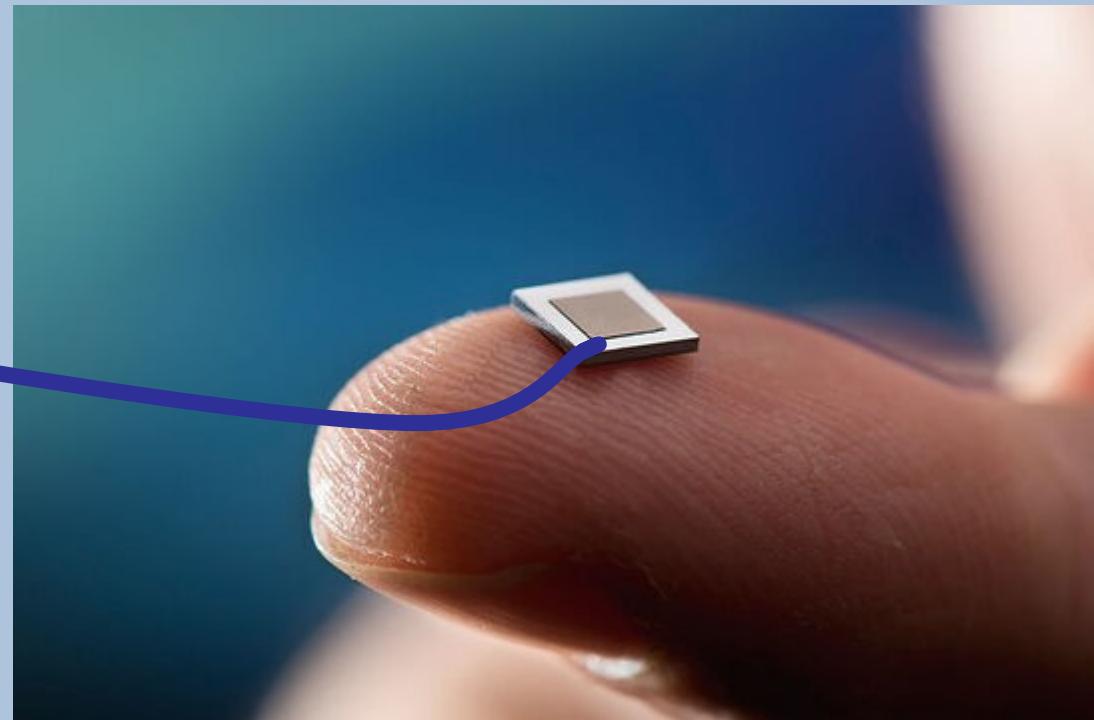

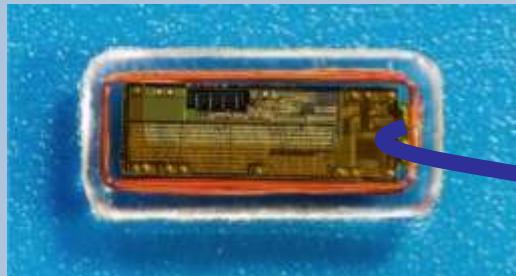

EYEMATE-Inject

Smaller
Soft
Injectable

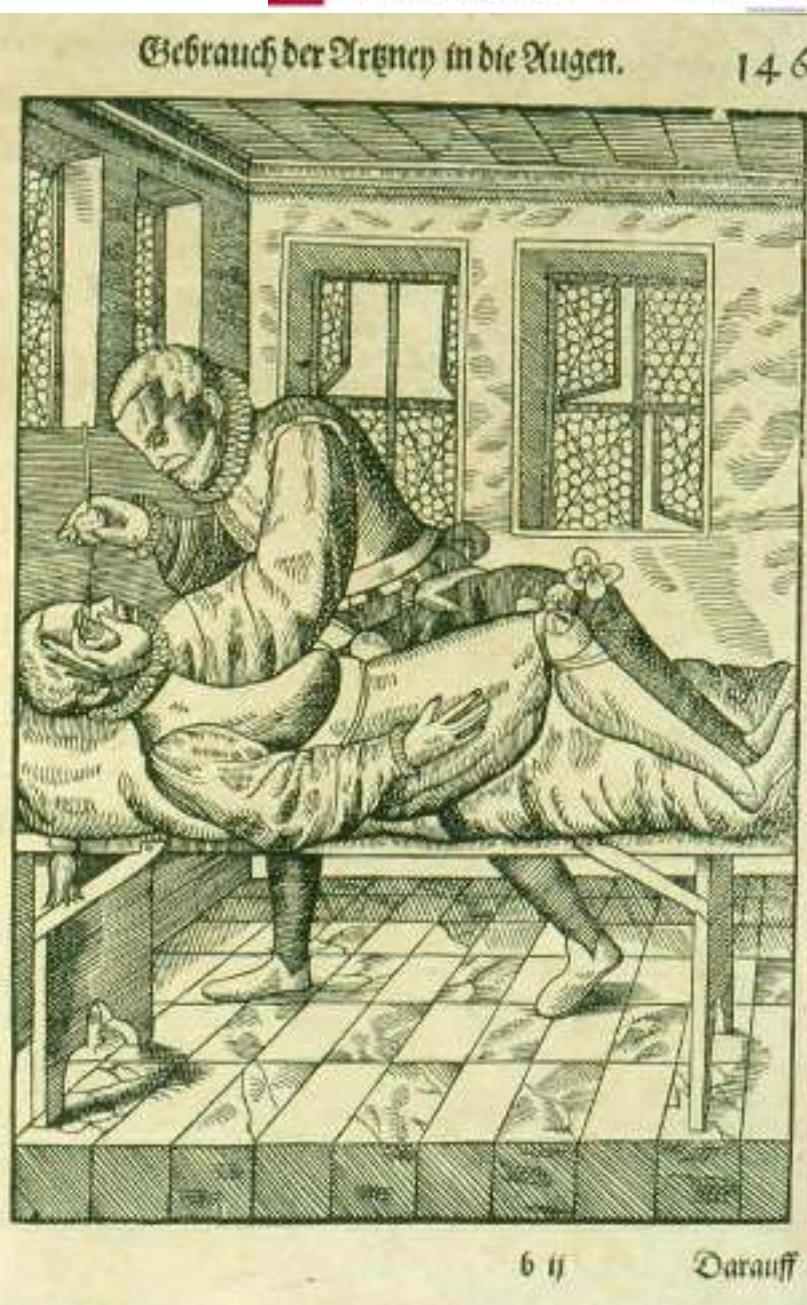

Hypothesis 7

- Pumps should/will be connected to sensors

Hypothesis 8

- Surgeons will take over medical glaucoma therapy

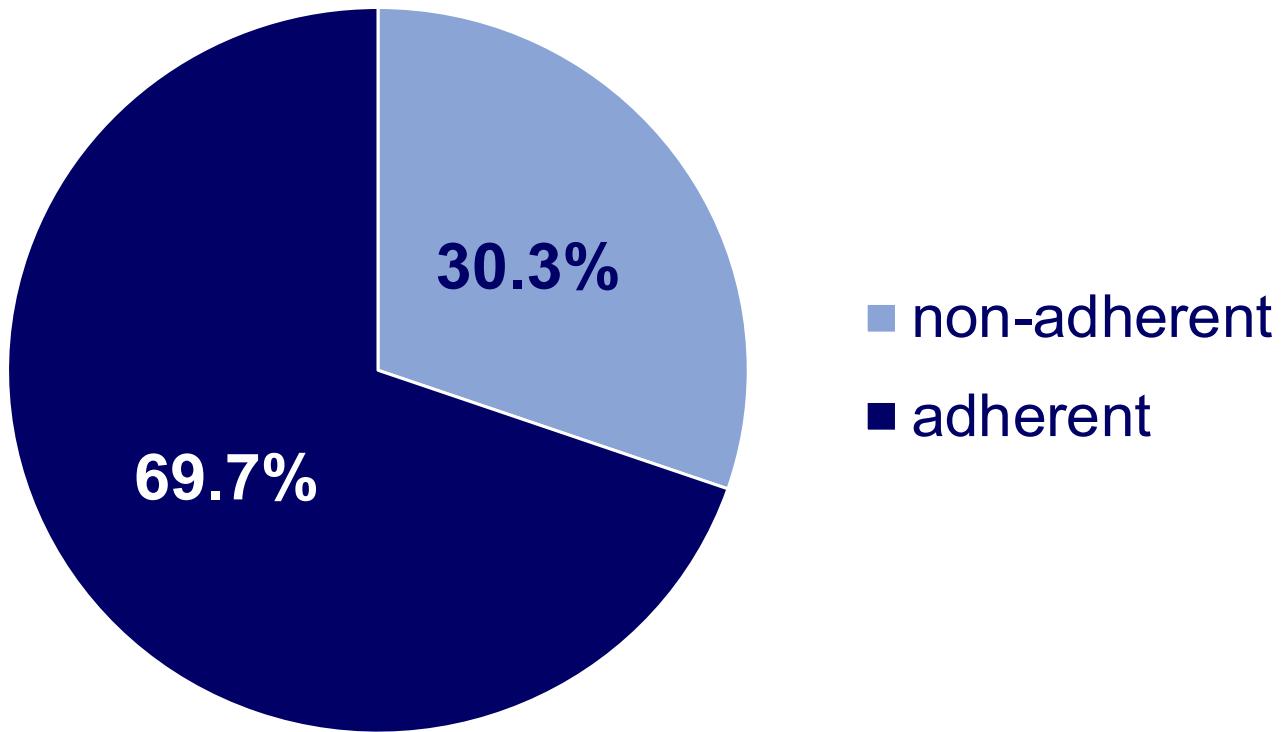

- Doctor's wish:
- Patient drops
 - regularly
 - punctually
 - correctly

- Reality:
- Always fear for the worst!

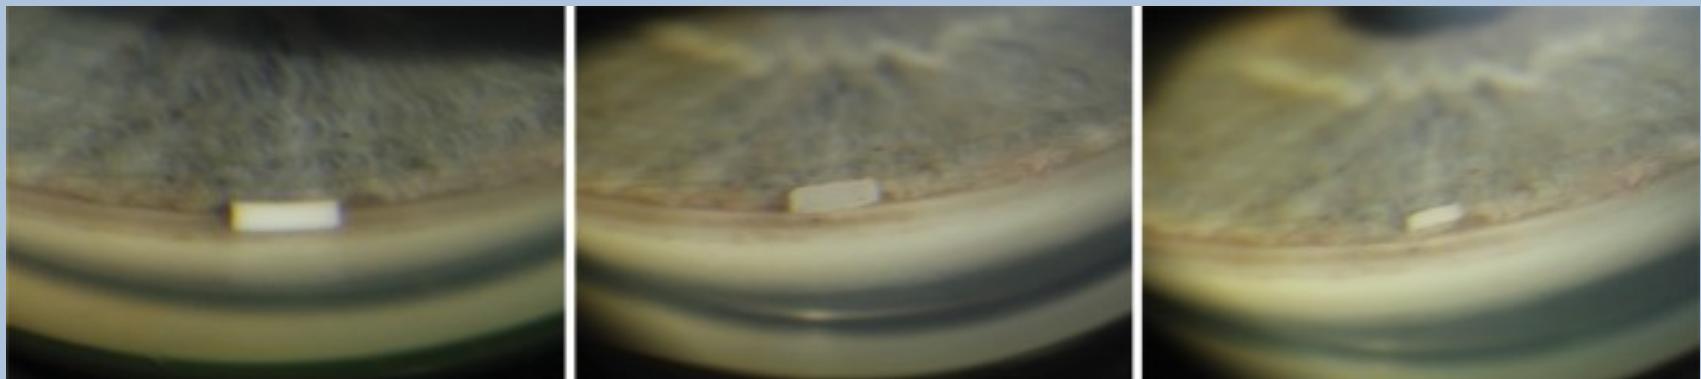

Self-reported adherence in a German cohort

Questionnaires in 201 patients; cut off: 5%

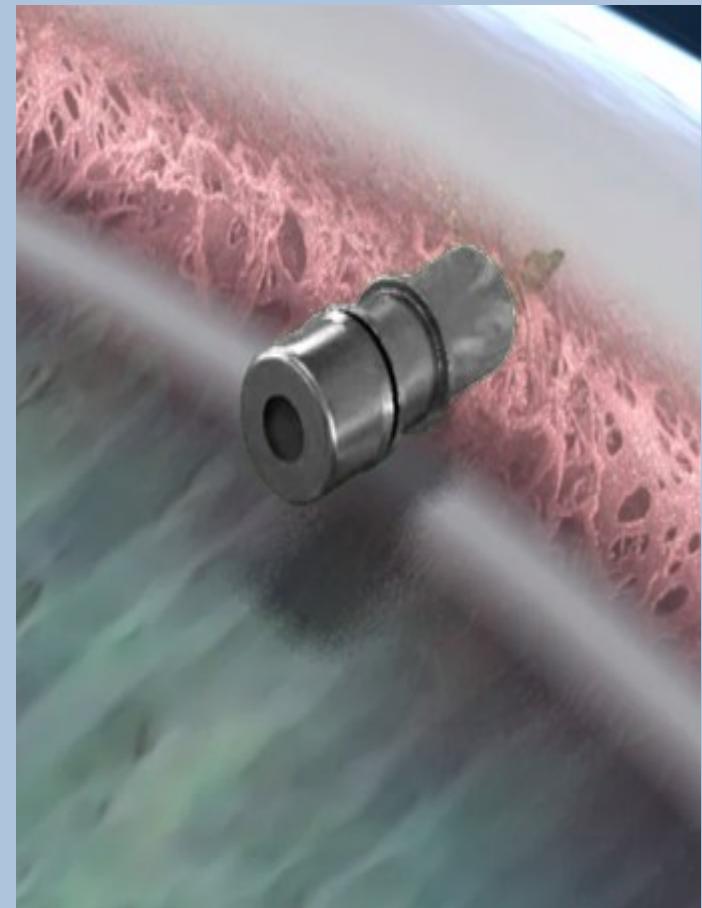

Bimatoprost Slow Release

- Injection into anterior chamber

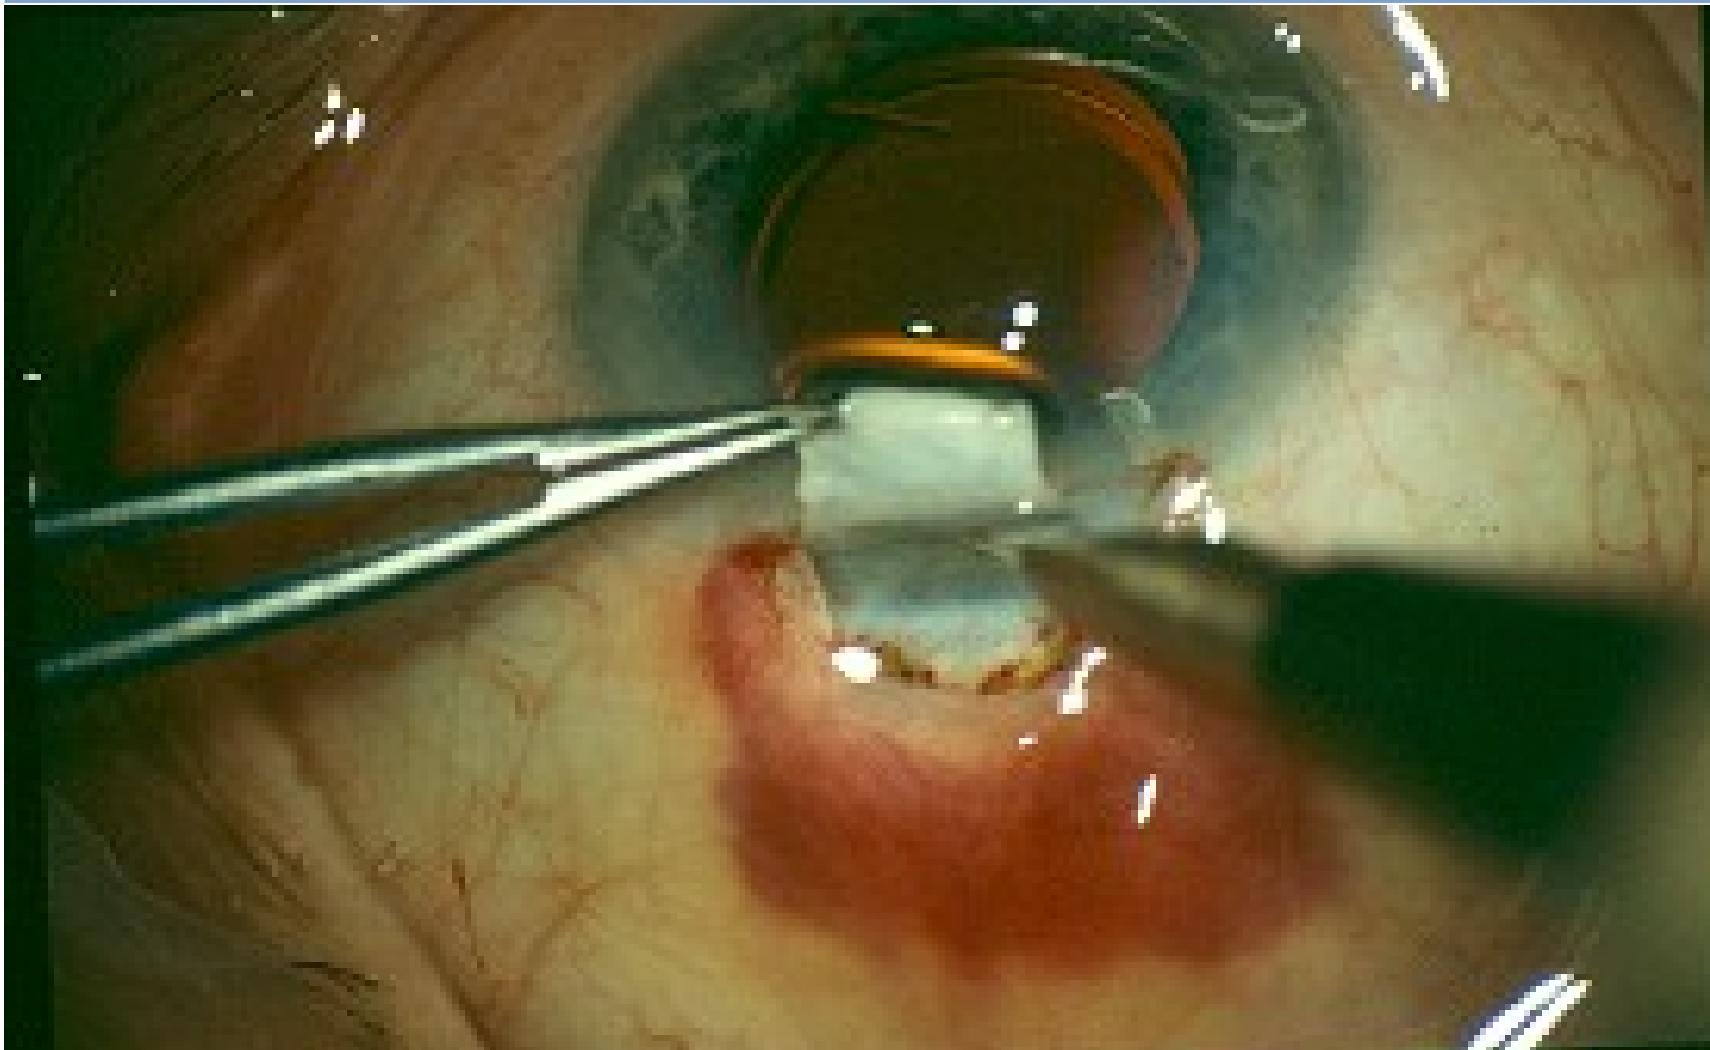

i-Dose (Travoprost)

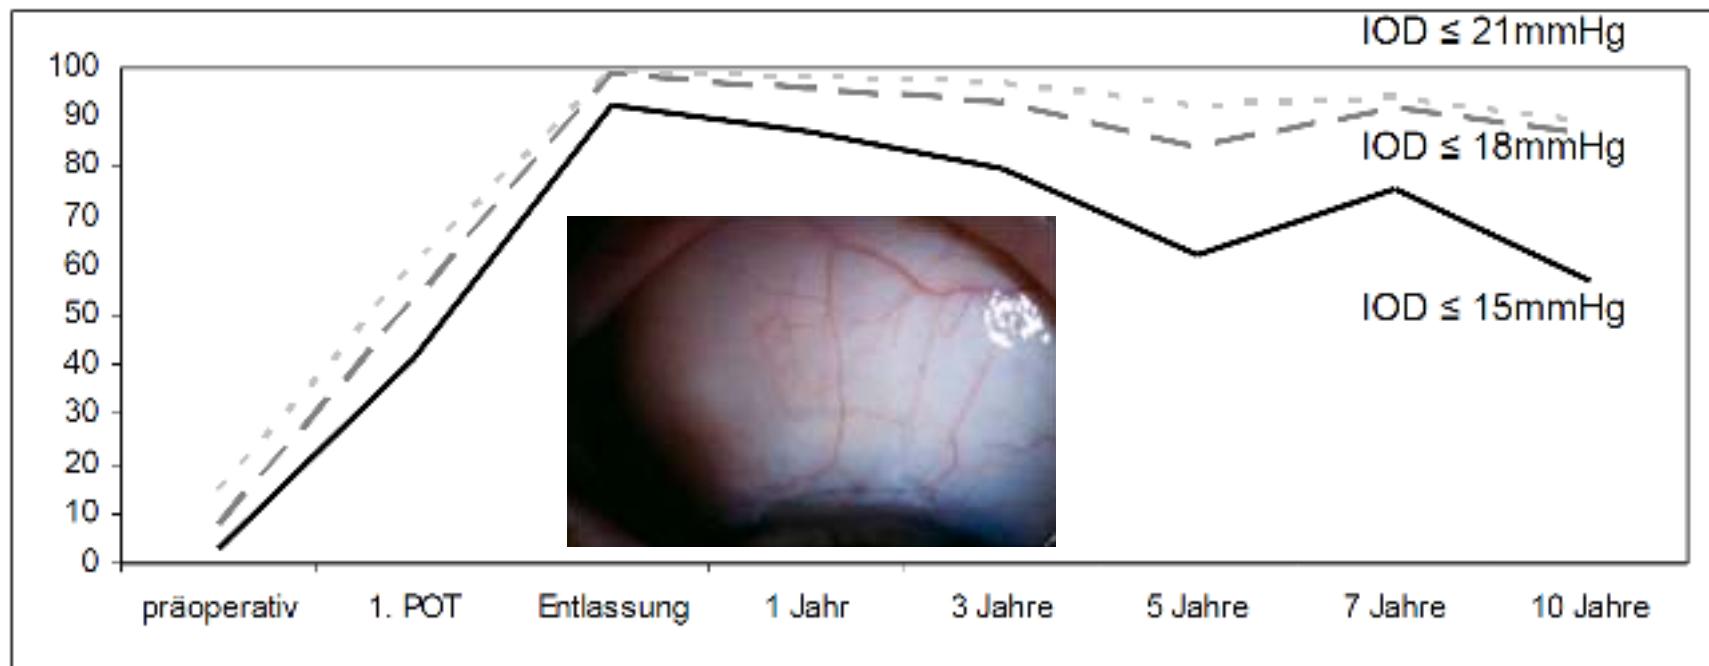

- Click to add Text

What about Trabeculectomy?

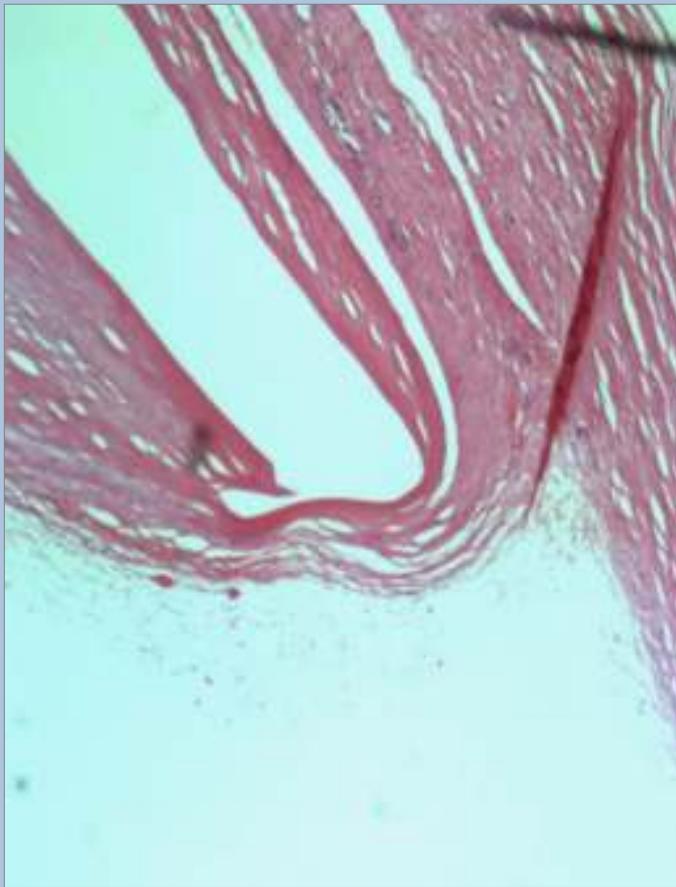

Trabeculectomy in Mainz: 10-Year Results

Hypothesis 9

- Fistulating surgery will remain with us for a long time

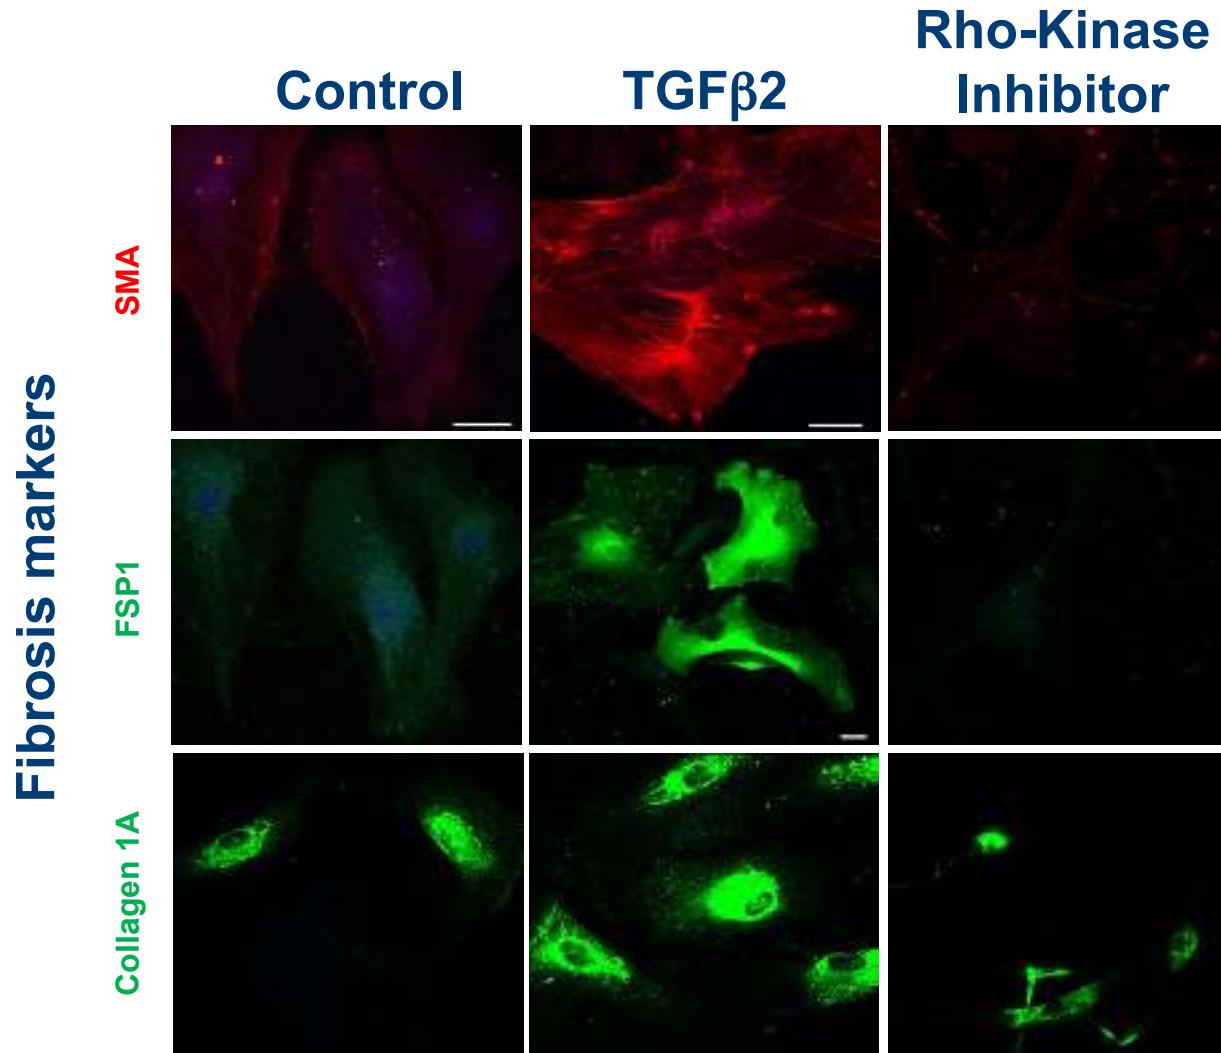

The wound-healing problem

Trabeculectomy

- Modulation of wound healing will improve
 - Rho-Kinase inhibitors

Modulation of wound-healing

Trabeculectomy

- Modulation of wound healing will improve
 - Rho-Kinase inhibitors
 - Antisense nucleotides

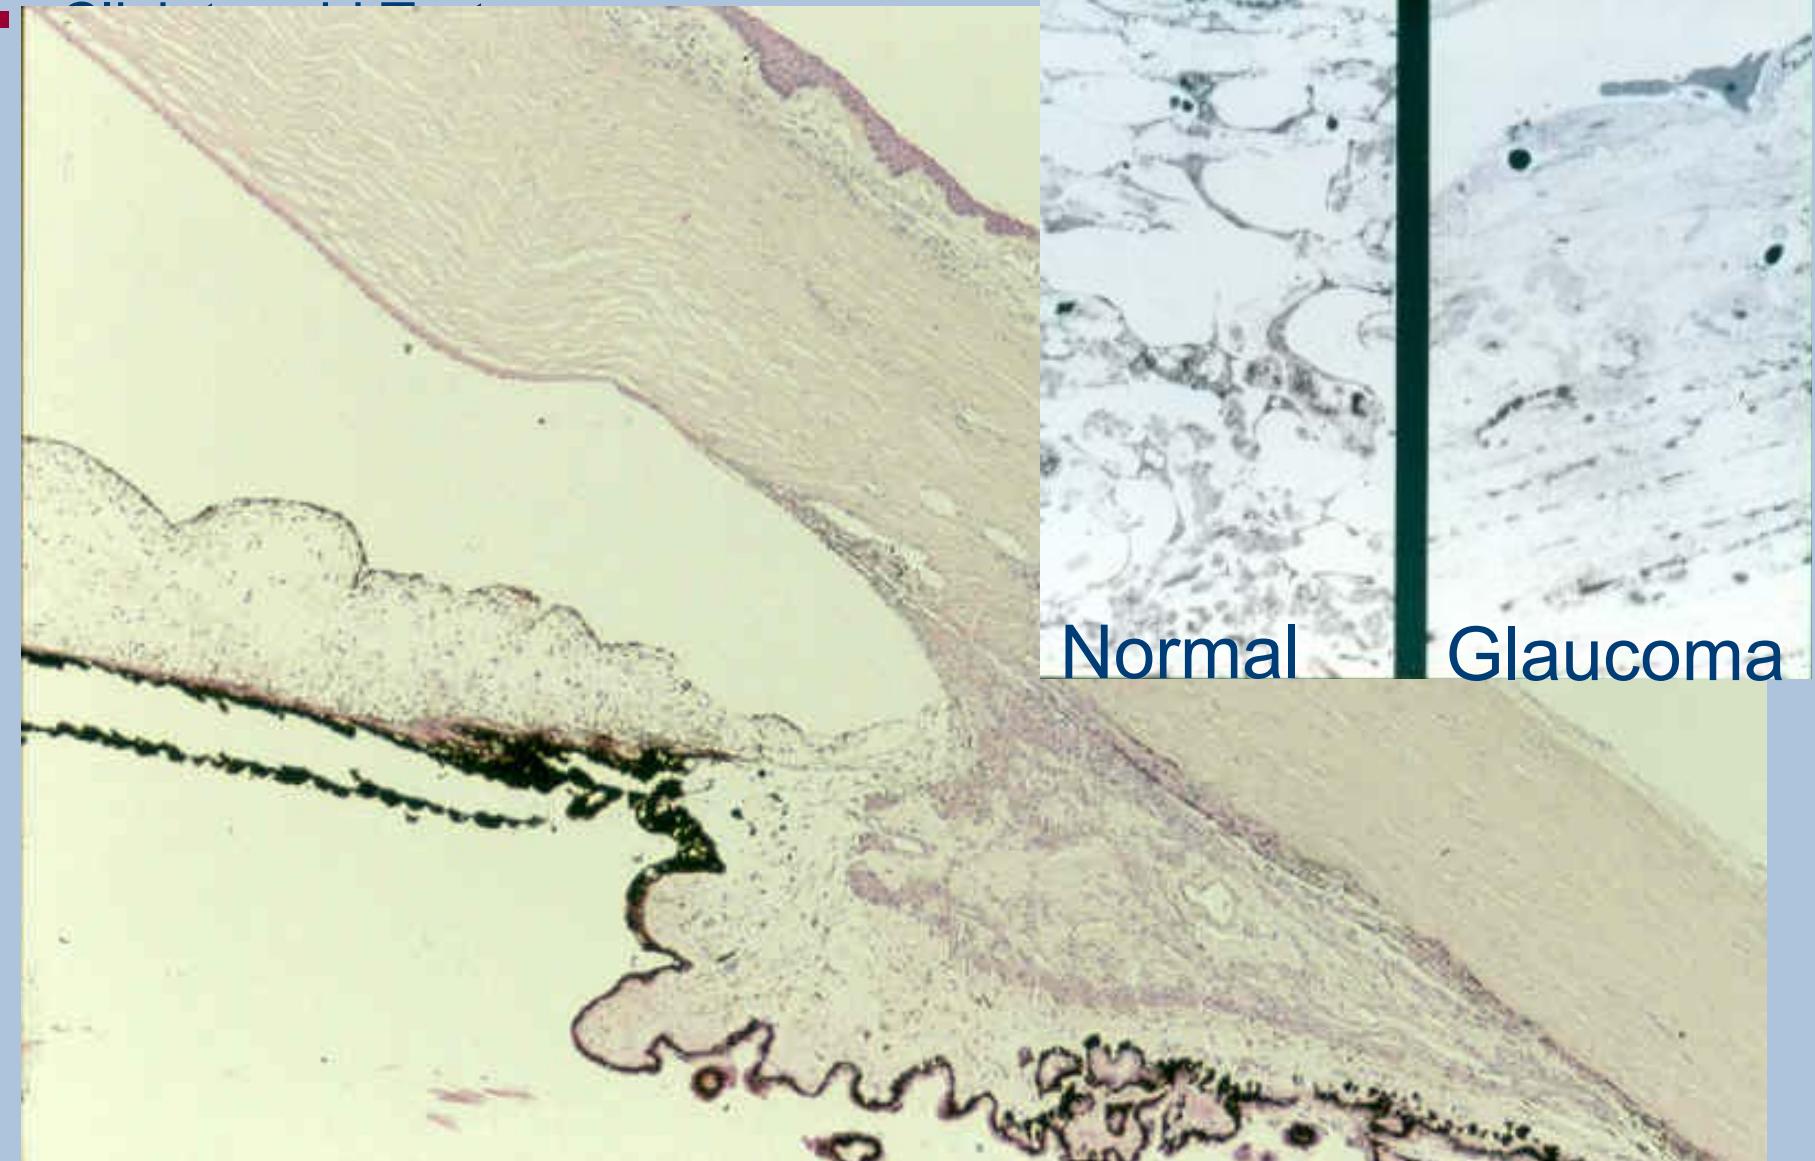

Elevated IOP in Glaucoma: Elevated Outflow Resistance

UNIVERSITÄTSmedizin.
MAINZ

Direktor: Professor Dr. med. N. Pfeiffer

Future Surgery

- Modulation of wound healing
 - Rho-Kinase inhibitors
 - Antisense nucleotides
- Genetic Surgery
 - CRISPR-cas

Future Surgery

- Modulation of wound healing
 - Rho-Kinase inhibitors
 - Antisense nucleotides
- Genetic Surgery
 - CRISPR-cas
 - mRNA-Vaccination

Future Surgery

- Modulation of wound healing
 - Rho-Kinase inhibitors
 - Antisense nucleotides
- Genetic Surgery
 - CRISPR-cas
 - mRNA-Vaccination

BIONTECH

Future Surgery

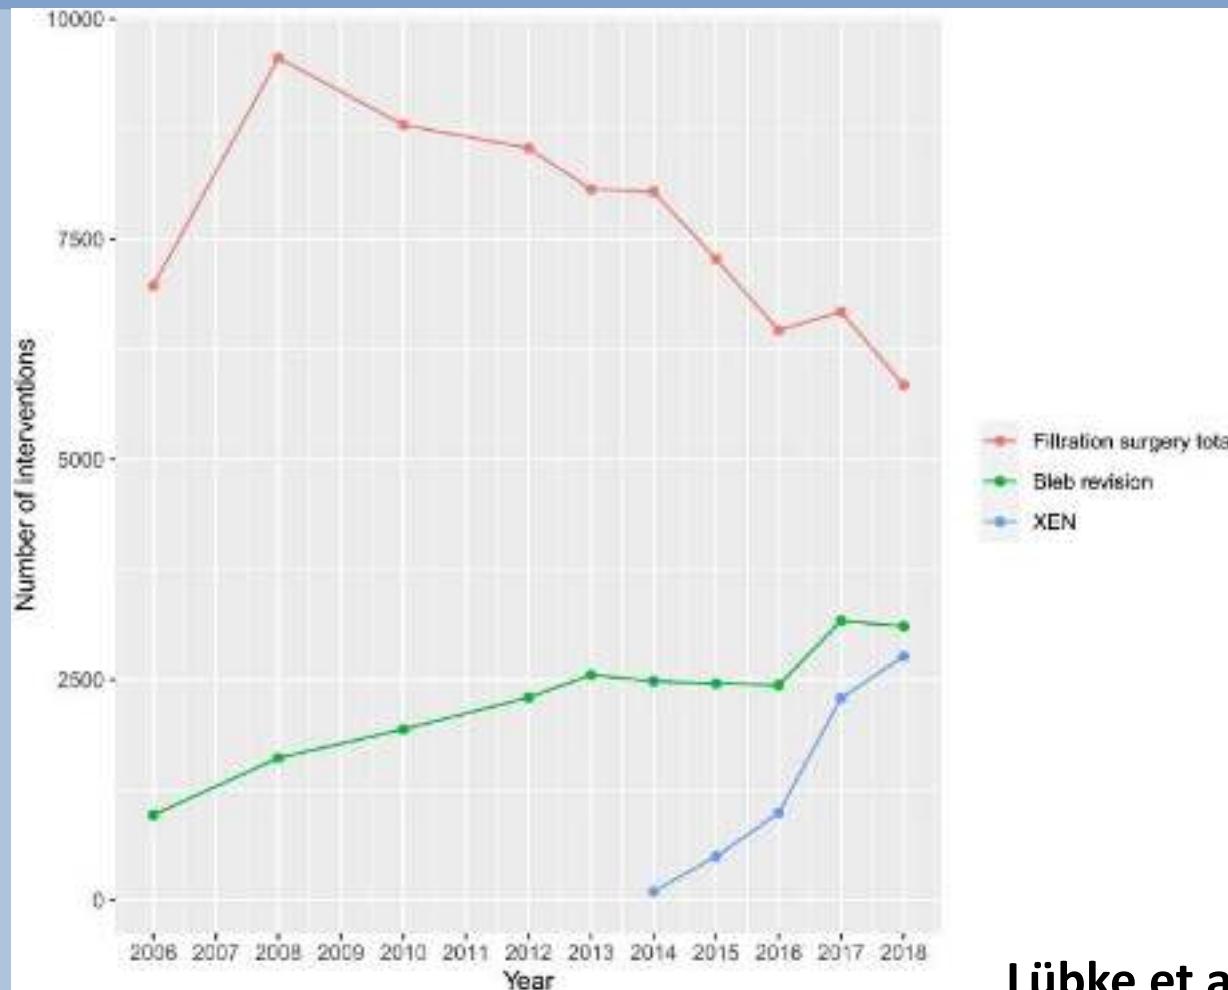

Biontech Headquarters
Mainz, Germany

Hypothesis 10

- Surgeons who can perform trabeculectomy will be in short supply

Trends in Glaucoma Surgeries Germany

Lübke et al., 2020

Summary

- More surgery, not less!
- „Lighter“ surgeries preferred
- Real time IOP measurement
- Real time IOP modulation
- Individualized real time IOP lowering
- Surgery meets medication
- Great opportunities for young surgeons!

Thank you for your attention
