CORNEA SYMPOSIUM: REHABILITATION OF UNRESOLVED CORNEA PROBLEMS

TACKLING THE LENS FOR THE CORNEA SURGEON

Nader F. Fawzy, FRCS, FICO, FEBO

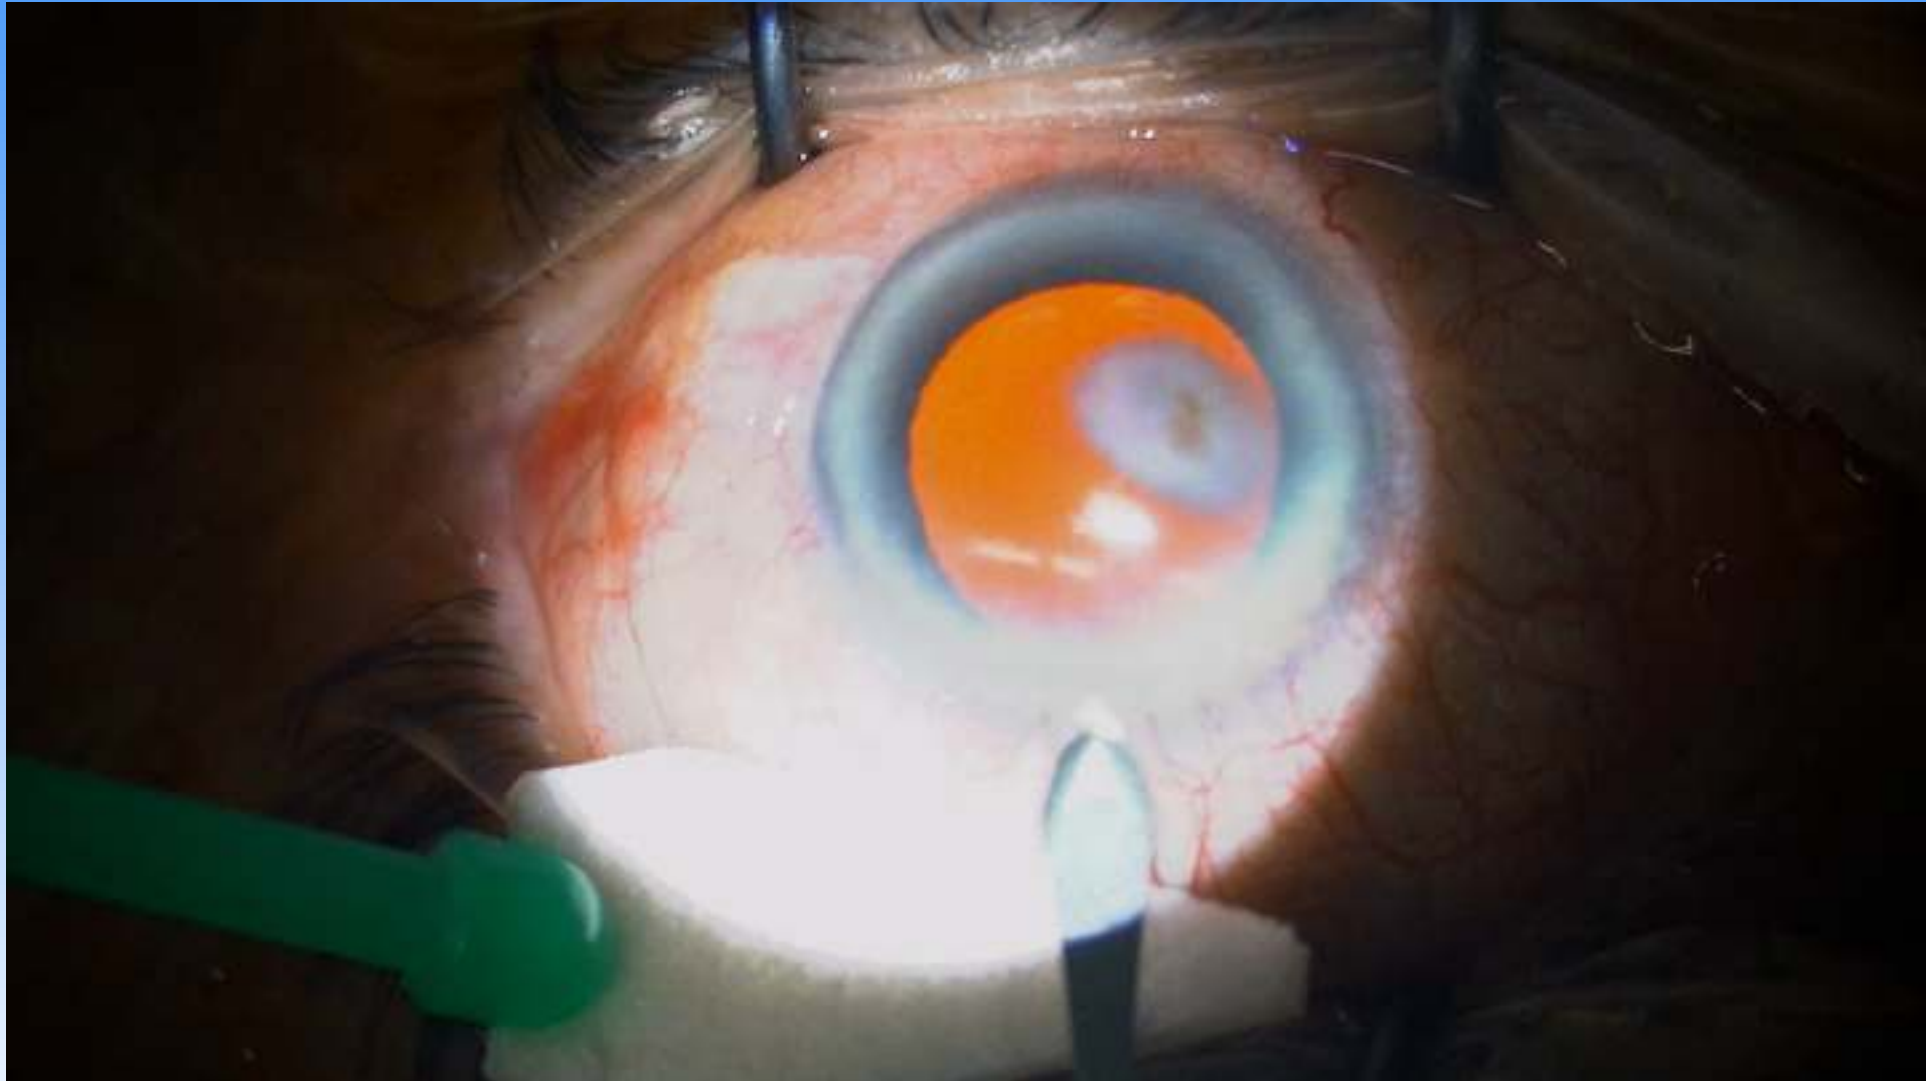

مستشفيات الوطنى للعيون
WATANY EYE HOSPITALS

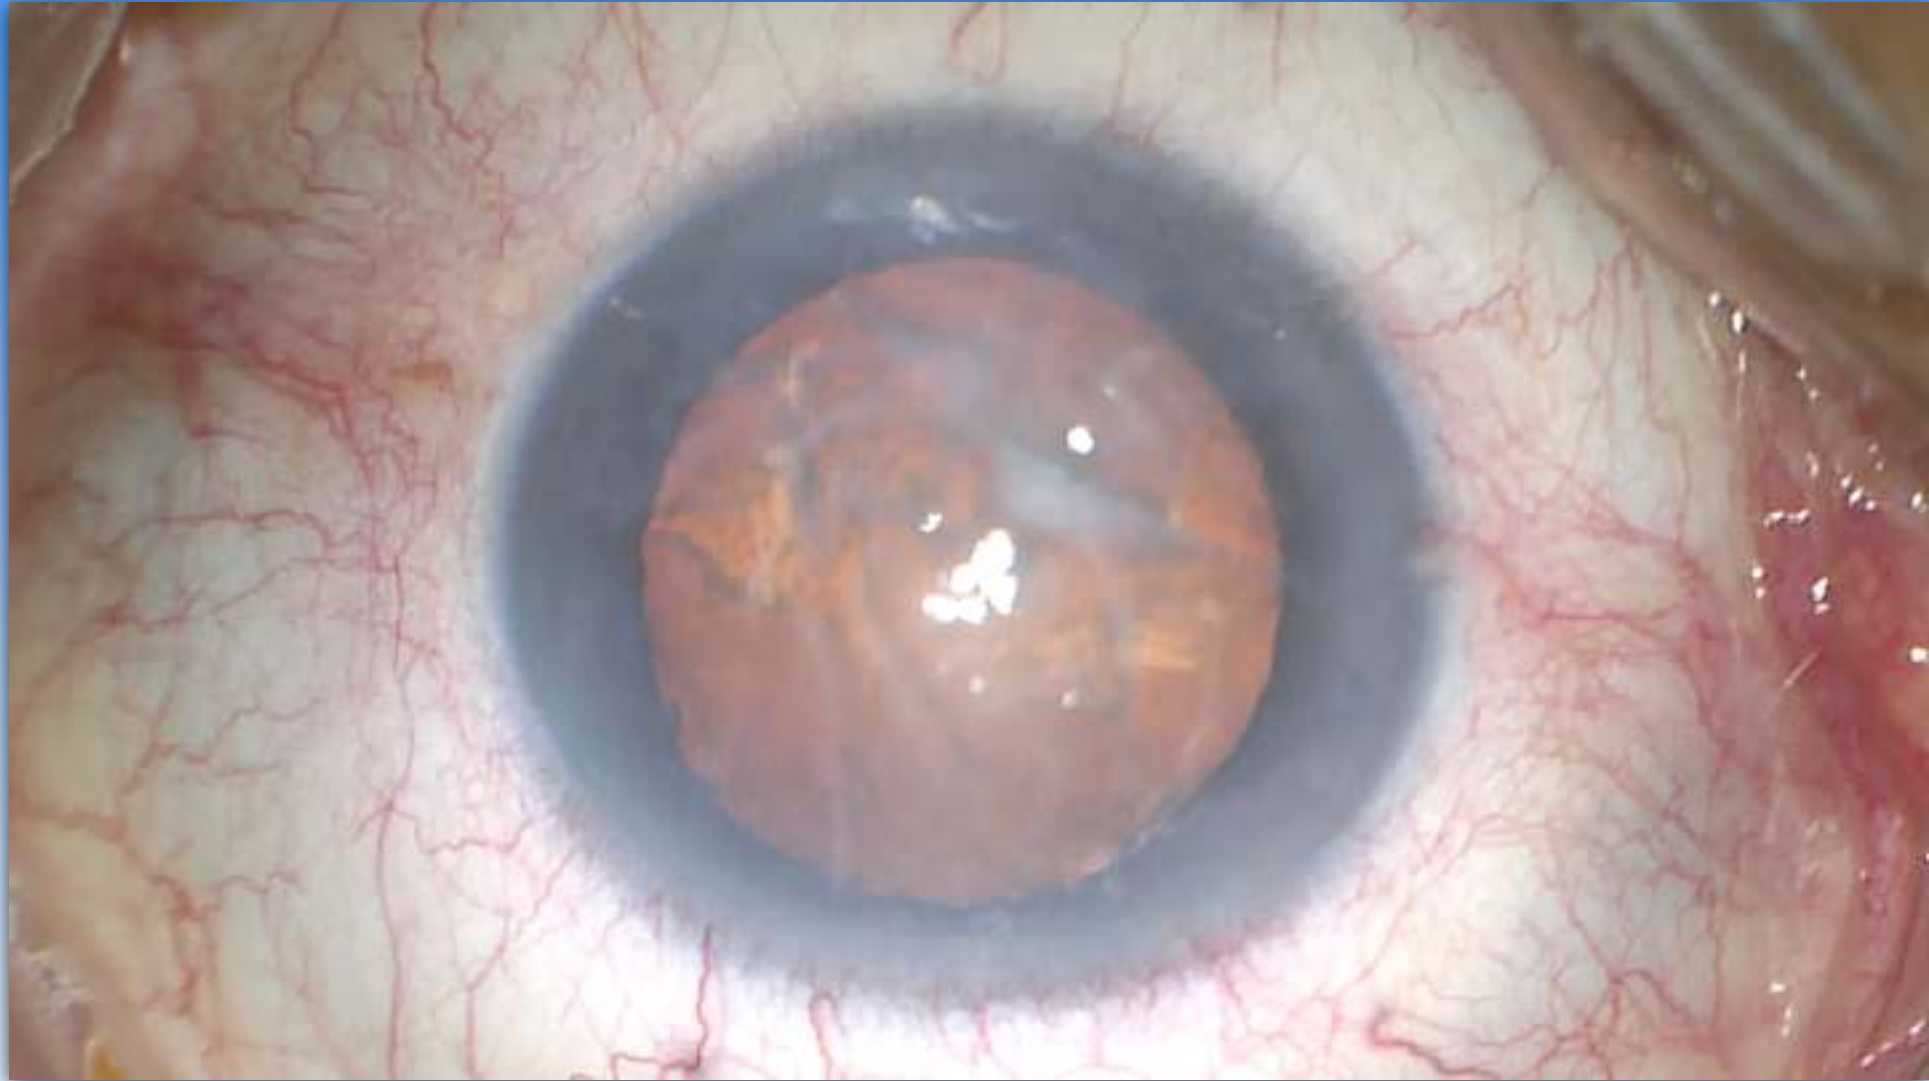

Difficulties during Triple Surgery

1. Visualisation
2. Anterior capsulotomy
3. In the bag IOL Implantation (open sky)

Scenario #1: Phaco despite opacity

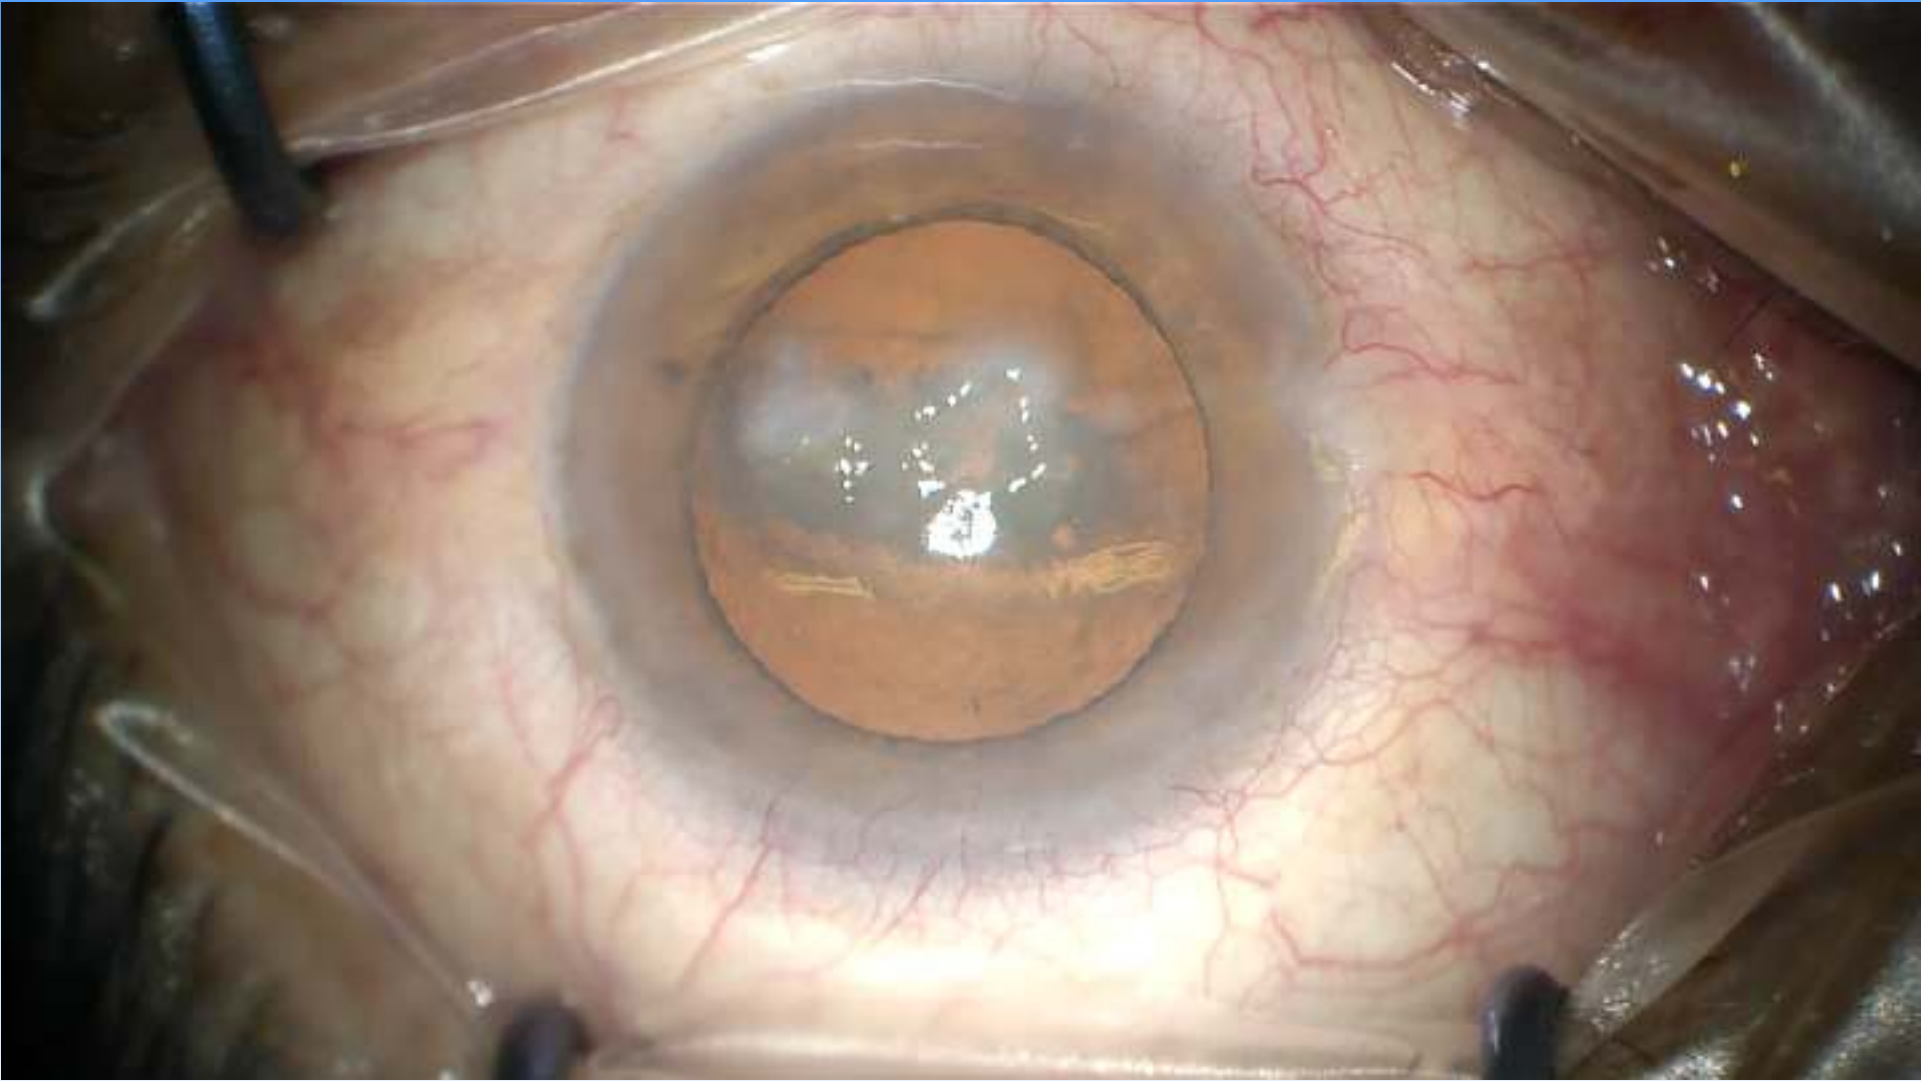

Scenario #2: Phaco after epi off

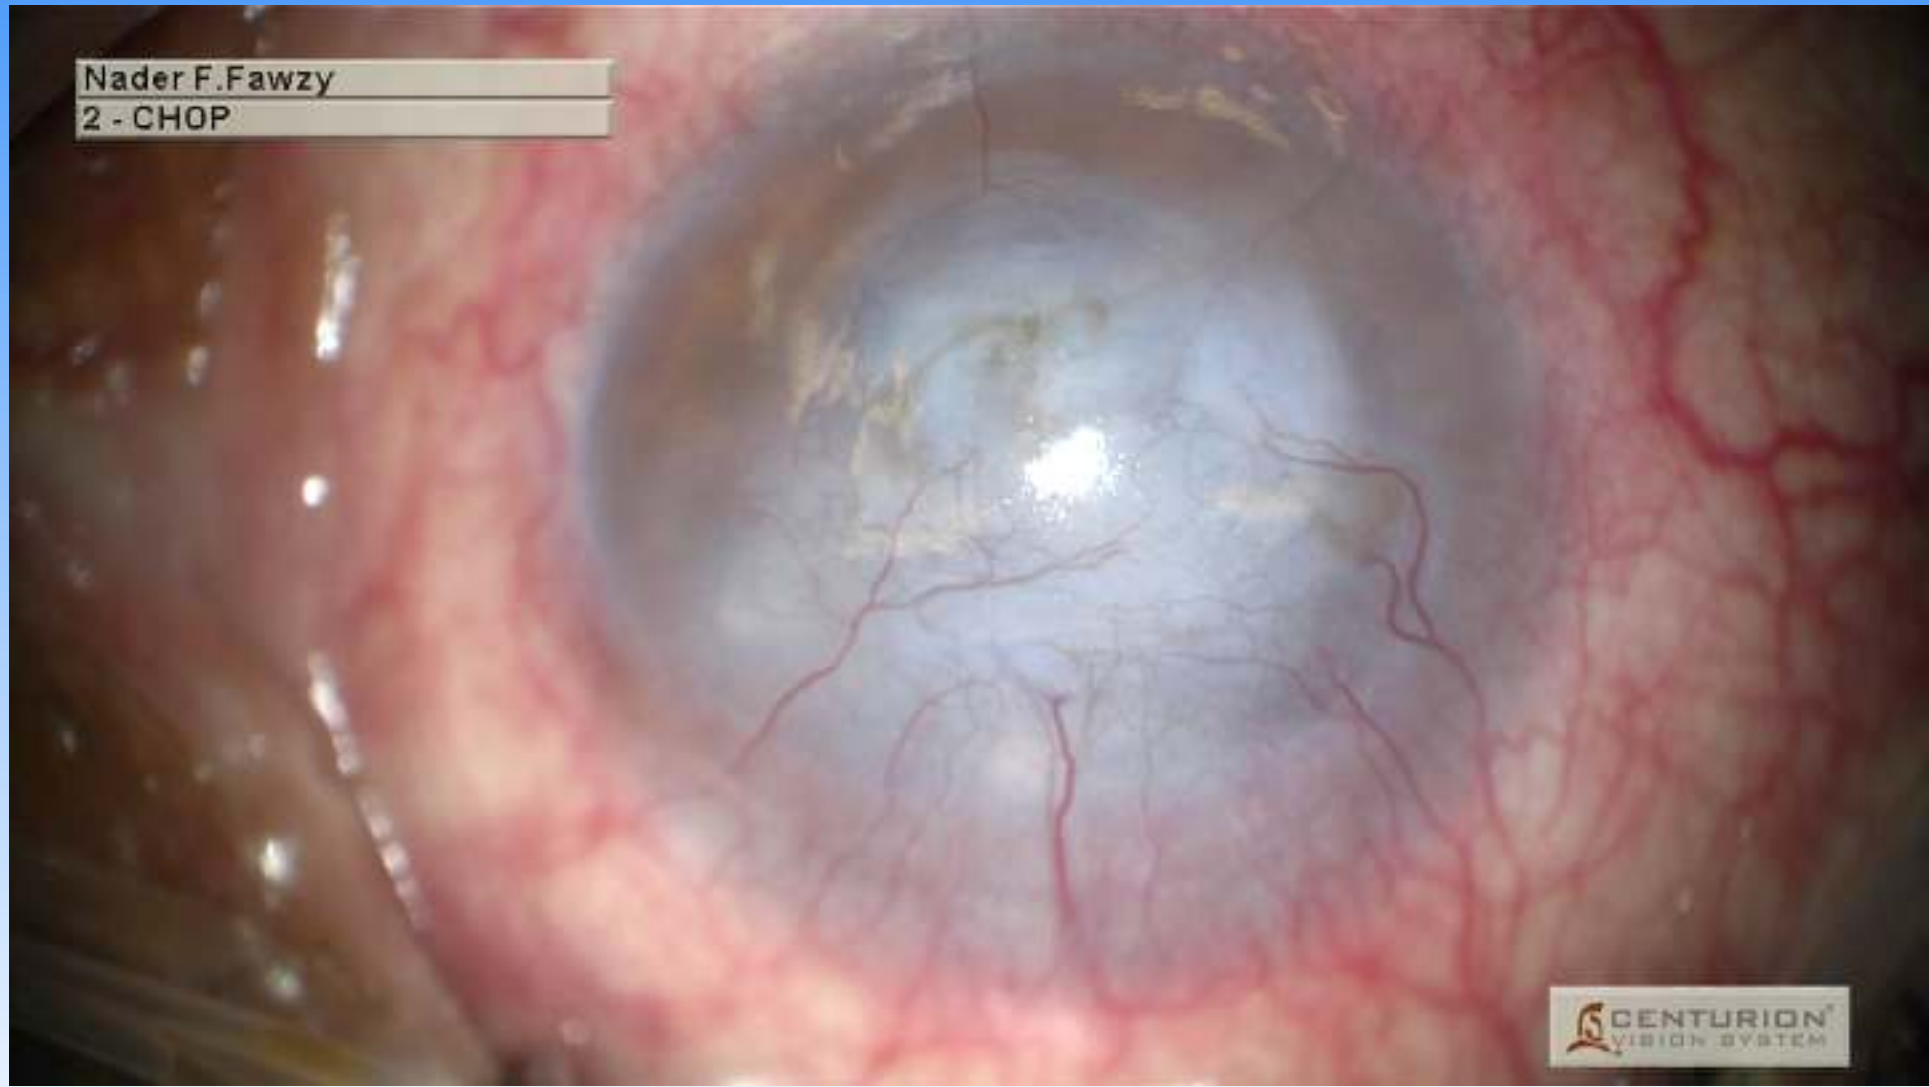

Scenario #3: Partial Trephination

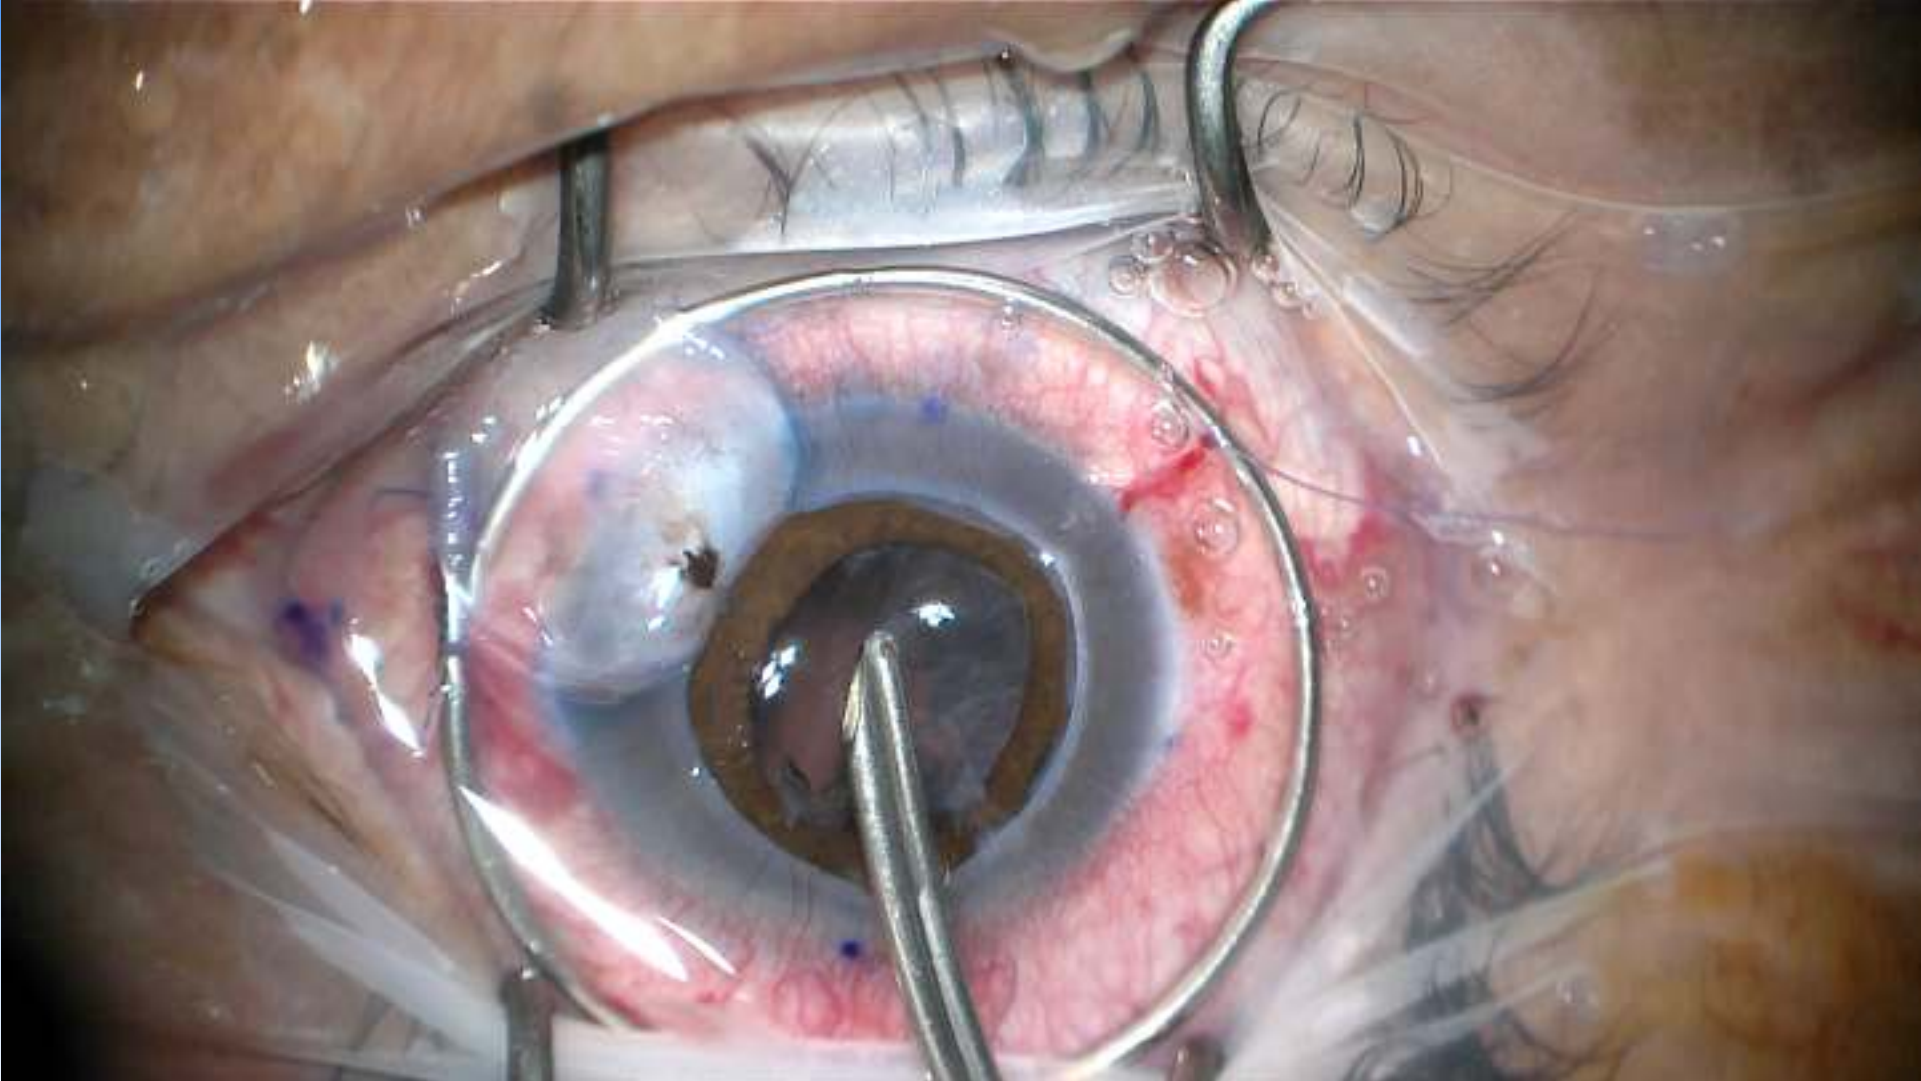

Scenario #4: Be flexible and switch

Scenario #5: the VISCO Chamber

Scenario #6: CTR for subluxated lens

Take Home Message

- Triple surgery does not mean you cannot do your regular Phaco
- Multiple techniques can improve visualization. Worth trying!
- Visco-chamber is a very useful tool for open sky rhexis
- Many steps can be postponed till after placing the graft
